Rost enter Ron SIG II-AA 660 and ship the fol item by routing water mkd for EVIL-SIG II-AA 660:

Power unit PE-95 G Stock Nr 3 H 4595 G es 130. Item urgently read to fill dues out to Korea and to replenish dep stocks which have been depleted. Recent issue and demand experience definitely indicate that the theater raning objective as shown on overseas comd forecast dated 28 Feb 51 is to low to support the power units in use in Korea and must be increased considerably. Due to lack of coml power sup in Korea and power unit over and above Table of Org and Equip auth are read as primary source of power for sig installations. Power units in use are read for continuous opu, therefore repair and replacements are read at a high rate. New ran objective is 360 sa and will be reflected and justified on overseas comd forecast dated 31 Mar. Power units repaired by local contractors and now in use, give sub standard performance and read replacements at much higher rate than new units. Ref Msg CX 57060 fm CINCFE to DA dtd 7 Mar 51.

Re URMSG (AG 704) (23 Mar 51) (TO) patient air evacuated requirements on channel 34-US and submitted on Reports Control Symbol CSGSP 29 (R 2) 17 Mar 51, is based on actual experience factors for the first 6 months of the Korean operation. Factors used were disease and non-battle injury rate Korea and Japan, battle casualty rate Korea and the projected increase in troop strength Korea and Japan. At this time a revision for Apr and May is not practicable, however, if the number of casualties returning from Korea continue as they have for the past 3 weeks, the space requirements can be reduced 25 to 35 percent.

NR : D 81493

Req approval of project incident to the Korean effort for installation of 4 diet kitchens in the 8th Sta Hosp, Kobe. Bed capacity has increased from 300 to 800 beds. There are no diet kitchens in the main hospital. Previously hospital has been utilized for non-surgical cases. Recently, however, increased Korean casualties have necessitated use for more serious surgical cases. The increased facilities are required in order to provide special food for patients seriously afflicted who can not walk to the central mess hall. Currently all food is prepared in the main mess on the first floor. Work consists of installation of electric ranges, refrigerators, sinks, electrical, plumbing and steam piping facilities. Work will be held to minimum essential requirements. Estimate \$5,170. Priority has been established by the Medical Section for this project. Confirming project will be submitted as soon as possible.

7	Wakamatsu	Kajima	2000
7	Wakamatsu	Se i.ka	1000
7	Wakamatsu	Nihon Tanko	1000

Request that shipping be assigned to meet the above schedule, which provides for the loading of 4000 metric tons of coal per day. Schedule for deliveries at loading ports, subsequent to 7 March, will be furnished as soon as possible. It is anticipated the shipping rate will continue to be 4000 metric tons per day throughout March. This requirement is assigned JLC request number 431.

3. In order to successfully lift this requirement every effort will be made by this headquarters to have coal available at loading port prior to, or upon arrival of ship; and to accord ship fastest possible turnaround. Due to the difficulties, experienced in the past, in the delivery of coal to loading ports designated in advance, it is recommended the following procedure be effected to meet requirement contained in Para 2 above:

a. Sufficient ships be nominated to lift 4000 metric tons coal per day from Japan to Korea; and such ships be used on a shuttle basis.

b. 2d Log Command advise this headquarters, daily.

estimated time of departure of all coal styips the Forea.

the port of loading of ship, by name, 3 days in advance of estimated time of arrival of ship at west coast Kyushu port

4. Request that shipping be provided to lift charcoal from

Wakamatsu to Pugan as follows:

Metric tons 2030 1000 996 March 1951 April 1951 May 1951

This requirement is assigned JLC Number 432.

DECLASSIFIED PER DA CIRC. #127 23 DEC. 53

INFO : CINCPE TOKYO JAPAN, CG FEAF TOKYO JAPAN, CG SFPE FT MASON CALIF, CG ARMY EIGHT

NR : EX 34136

REURMSG DA 83667 rqn being placed with Overseas Supply Division, San Francisco Port of Embarkation for airlift of 20,000 illum hand grenades for earliest delivery and additional water lift at rate of approx 15,000 per month. Believe these would be better than 949 trip flares especially when used in conjunction with M 17 A 1 ground signal white Star parachute and newer T 73 as soon as it becomes aval. M 15 white phosphorus hand grenades are desired for use instead of the white phosphorus rifle grenade as they contain more white phosphorus. Further there seems to be an added psychological effect of the air burst of the white phosphorus hand grenade over the fragmentation hand grenade. An increase in the quantity of M 2 adapters will be necessary.

Request initiation of development of adapter for use with M 15 white phosphorus grenade. Line of attach here is to make a can of diameter to fit M 2 adapter at base but large enough in diameter to fit grenade. Arming band furnished with M 2 adapter to be used. Can to have elips at top to prevent grenade from sliding out after grenade, can and adapter are assembled. Believe long range plan, besides time fuze for fifle grenade could be the assembling of a flange to the M 15 white phosphorus grenade at time of manufacture so that if could be held in M 2 adapter.

UNCLASSIFIED
OPERATIONAL IMMEDIATE

8 Feb 51 .

FROM : OG JLCOM YOKOHAMA JAPAN

TO : DEPTAR (COFORD) WASH DC

INFO : CG ARMY EIGHT, CINCFE TOKYO JAPAN

NR : DX 70006

Re inquiry made through Overseas Supply Division SFRAN Port of Embarkation for grenade adapters for use with M 15 white phosphorus grenade. Further inquiry from Eighth Army for adapter for M 49 type trip flare and modification flare for rifle launching. Inquiry was made through Overseas Supply Division SFRAN Port of Embarkation regarding illuminating hand grenades which are a Navy item. It is understood that Navy illuminating grenades may be launched with the M l grenade launchers. Illuminating hand granades have burning of 25 seconds VS 60 seconds for trip flare. Info requested of problem of firing white phosphorus grenades M 15 with adapter M 2 if modified to hold grenade by making an adapter withfingers long enough to reach top of white phosphorus grenade. Could a modified adapter be made in ZI expeditiously or could white phosphorus rifle granade be refu ed to give air burst? Soft ground and water in rice paddies either fail to detonate white phospmorus grenade or prevent white phosphorus from acting. Could trip flares without binding plate and trigger be furnished for use with M 2 adapter?

Immediate right is for 15,000 flares and adapters. Estimate that right for air burst white phorphous rifle granades or adapters for white phosphorus hand granade M 15 to be 15,000 per month based on half the average expenditures for white phosphorus rifle granade.

DECLASSIFIED PER DA C

23 DEC. 53

25 Jan 51

1. The present requirement for perishable subsistance in Korea is approximately 7000 mtons per month. The major portion of this requirement is being met by shipment from the ZI of approximately 1/3 of the tonnage on each of regularly scheduled tri-monthly trans-Pacific reefers, routed Japan, Pusan, Each cargo (10 day supply) approximates the entire shore storage capscity at Pusan. This situation precludes the carrying of any levels beyond current consumption pd.

2. Past experience has shown that the majority of trans-Pacific resfers do not carry sufficient quantities of certain basic items to permit issue of complete meals to all troops. In the past this deficiency has been corrected by drawing aufficient quantities and types from JLCOM depot stocks, and booking such for immediate shipment to Pusan in accordance with current procedures. Tonnage involved has amounted to less than 150 mtons in each case. It is believed tonnage will never exceed 500 mtons, and that average will be between 150 and 200 mtohs.

3. According to reports presently available to this has, there will be at least 5 days difference in arrival at Pusan between the original cargo ship and the supplemental cargo on the last shipment moved (Flying Dragon and AKL 18). Because of issue and internal delivery difficulties it is imperative that the cargoes arrive simultaneously.

4. It is not possible to place a long range requirement for shipping of perishables from Yokohama to Pusan for the following reasons:

The quantities and types, required to supplement the cargo loaded in ZI, cannot be determined until receipt of manifest of trans-Pacific reefers, which is usually 5 to 7 days from ATD to ship.

b. Delivery date at Pusan for supplemental cargoes cannot be given sufficiently far enough in advance to permit (over)

2. This ha considers the sailing of both ferries, passenger and cargo, from one port highly desirable. The following advantages favor Moji Ports

a. Savings in rail and shipping time.
b. Shorter distance for troop movement.

c. Saving in freight charges.

3. However, the scheduled sailings of passenger and freight ferries are not so interrelated as to make it mandatory that both be sailed from the same port at the interreleted as to make it mandatory that both be sailed from the same port at the present time. There are two important but unrelated factors:

a. The processing, comfort and care of troops.

b. The economical and expeditious handling of high priority

cargo.

4. Camp Mower in close proximity to Sasebo at present has adequate facilities for the processing of troops. Moji Port, due to previous commitments, does not have adequate housing facilities aval for the processing of troops. Therefore, transfer of passenger ferry operations to Moji is not presently feasible.

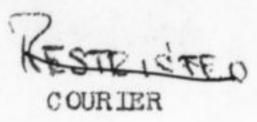

5. Moji with its excellent port facilities, being geographically

WERKILL TO located 118 miles nearer Yokohama, from which most Red Ball cargo orinates, offers the following advantages which are of such importance as to preclude the transfer of cargo ferry operations to Jasebo.

a. Economy: Two dollars and forty-two cents per short ton on Red Ball cargo is saved in freight charges by using Moji in lieu of Sasebo.

b. Time element: 4 to 52 hours is saved in rail time and ship sailing time by using Moji Port. Rail cars are aval sooner for further dispatch.

6. It is recommended that:

a. Red Ball cargo operations continue from Moji Port.

b. Passenger ferry operations continue from Sasebo until such time as facilities in the vicinity of Moji permit transfer of the passenger ferry terminal to that port.
