Subj is GARIOA budget estimates for FY 1950.
Reurad ZMGNEB 179 of 28 Jun and ourad 82226 of 26 May.
Question as to change in administration relative to 1950
program is immaterial. It is anticipated that program will
continue regardless of changes in administration. Therefore,
it is requested that you submit 1950 GARIOA budget estimates
for all GARIOA projects in as accurate a form as available
data will permit and as soon as possible.

Colonel Binns now on temporary duty in your command
collaborated in the drafting and submission of ourad 82226 and
is familiar with all details.

Doctor Anderson now on temporary duty concurs in this
cable. The following is being sent at the request of Doctor
Anderson:

In making estimates for projects 413 and 415, suggest
you consider including funds to carry about 100 persons
in Economic Aid Mission and about 200 technicians and
consultants who would work directly with Korean Govt. It is
suggested that consideration be given to increasing the nbr of
agricultural technicians and scientists above recent estimates
by you hq, in order further to build up higher agricultural
education and to promote scientific research and experimentation
and extensive instruction. It is felt here that every effort
should be made to increase cereal crop yields in Korea to
levels achieved by Japan in order to achieve sizeable rice
exports in the years to come, and thereby more fully attain
a balance of trade.

NOTE: ZMGNEB 179 is not of record in this hq.

DECLASSIFIED PER DA CIRC #127
23 DEC. 53

NR : WARX 84933

Re telecon 9646 dtd 21 Jun. Contract for purchase 75,000 mtons Taiwan sugar air mailed to Dawson, Agricultural Attache Shanghai, today. Copy also mailed to SCAP. Suggest SCAP send representative to Shanghai to complete collateral contract with Central Trust. If this is not possible, notify Dawson.

Contract will specify 5¢ per lb FOB Tokyo for Taiwan nbr 2 or better with option for Chinese to ship up to one half total in Chinese ships at 5.25¢ per lb Yokohama or 5.22¢ Kobe. Sugar to arrive in Japan not later than 31 Oct. Financial aspects of the contract provide for Chinese to receive 50% of the funds in US dollars and the remaining 50% in credit to apply against purchase of commodities and/or machinery to be made in Japan. This will require a collateral agreement between SCAP and Central Trust with respect to the use of these credits. Commodity Credit Corp will pay 50% of the cost of sugar in US dollars into Japanese funds to offset the Chinese export credit. These funds will be transferred to a SCAP commercial bank account at your direction.

Reurad CX 61695, 18 Jun 48. Subj is Spanish potash.

1. The 50,000 tons of potash from Spain now under negotiations by CINCPAC and USAFIK with pvt traders has been considered together with other reported and expected availabilities against FY 49 reqmts. The DA desires that these contracts be finalized utilizing FY 47 and FY 48 funds allocated to Fiscal Dir WAC for this purpose and that the contracts specify delivery of 30,000 tons to Korea and 20,000 to Japan. It is necessary that this distribution be made in order that possible non-deliveries against contracts to be signed in the near future with Soviet Trade Representatives will not be borne entirely by one area.

2. Entire fertilizer program FY 49 is now being finalized. Details will be transmitted to you in near future.

3. If not possible to obligate funds for procurement Spanish potash prior to 30 Jun, request advice soonest so that funds can be withdrawn and utilized for other urgent needs.

Reurad Apr C 60069 and ourads Mar W 97821, Jan W 94700, Jan W 93764, and May 47 W 97693. Reurlet to Chief, CAD subj, relation assets to OJEIRF to restitution, File AG 386.7 (12 Feb 48) CPC/FP.

Relaxed standards of identification looted property is subj.

1. Interim Directive re restitution did not contain relaxed standards of identification provision because of Army Dept fear of jeopardizing negotiation with EX-IM and other banks re OJEIRF credit. Urlet recd during negotiations clarified situation respecting these liquid assets, however, add delay which would have been involved in study by bankers and interested Depts of Govt and Army believe undesirable inclusion 15 ourad 97693 or substance ourad 94700 in Interim Directive at time of issuance. Mr Paul Cleveland, who handled these negotiations for Army, now in Japan as OJEIRF controller. Request he be consulted re recommendation in ourad as to whether amending directive at this time would be prejudicial to or inconsistent with OJEIRF contract in view of negotiations and commitments.

2. Assume your recommendation designed principally to facilitate adm of restitution program. Request your comment whether proposed relaxed standards might affect items presently classified as unidentified loot subj to liquidation to extent that would interfere with Japan's economic recovery.

3. Meanwhile FEC still considering revised restitution policy, including provision outlined ourad 94700. Though agreement theoretically possible, efforts to meet USSR re matter of raising ships in Far East waters on which paper was vetoed earlier do not look promising.

Reewith Semi-Weekly Report Nbr 64 on State Dept (OII)
treatment of major current issues:

1. Warsaw Meeting: In reply to Soviet propaganda barrage,
which will undoubtedly follow Warsaw announcement, point out:

A. Announcement does not seem to offer anything that goes
beyond often stated Soviet intention toward Germany. Consistent
difficulty in all dealings with Soviet govt has been inability
to make progress toward agreement on even the elementary require-
ments for unification of Germany (such as setting up provisional
German govt resting on sound economic conditions rather than on
an economic structure burdened down with exorbitant reparations to
Russia and weakened by Soviet's hold of key industries in the
Eastern Zone; agreement on certain common fundamental principles for
the conduct of the German Govt, such as protection of civil
liberties; restricting the powers of the German govt by preventing
over-centralization). Because prospects for reaching agreement

FROM GSCAD RO NR : WX 84720 27 JUN 48 CONT'D

on any of these basic questions were remote, western allies saw themselves compelled for the time being to act on their own. If Soviet Govt should now be ready to work sincerely for agreement with other allied powers as a basis for realization, for all of Germany, of some of the principles which are stated in the announcement, more tangible evidence will be needed than a mere reiteration of general aims.

B. Certain features of the announcement seem more indicative of Soviet intransigence than amenability on crucial points: For instance, the recommendation that the German Govt be constituted from "representatives of the democratic parties and organizations of Germany" which in standard Soviet phraseology could only mean the type of one-sided govt which exists throughout the Soviet sphere including Eastern Germany.

C. The apparent concern for an all-German settlement seems to be belied by Soviet pressure now applied upon Berlin as part of a policy which wants to absorb all of Eastern Germany into Soviet sphere - a policy of flagrant disregard for interests of the German people as well as for Allied agreements.

D. Watch for evidence of opposition to German economic recovery on the part of the govts represented at Warsaw meeting, such as statement of Polish Deputy Foreign Minister on 25th criticizing London Accord for not containing sufficiently severe restrictions on German industry and for in effect treating Germany as an equal.

2. European Recovery Program:

A. In reporting agreements now being closed between US and various ERP nations, output in all areas should guard against picking up such press terms as "France has accepted US terms." Rather, report should state that the two countries have come to an agreement on the terms. Any implication of an "acceptance" of terms would play into the hands of propaganda that participating countries are having to accept distasteful terms along with the Recovery Program. Emphasize that the commitments made in the agreements are the same as those the ERP countries' representatives made on their own initiative at the first Paris meeting of the CEEO on Sep 22, 47.

B. Note British Labor Minister's statement at ILO conference in San Francisco that opponents of ERP have been unable to convince workers of western Europe that they are being exploited

economically or politically.

C. Contrast the above with Czechoslovak announcement of drop in production in that country due to "decline in worker's morale".

UN Prestige: In line with previous guidance, continue efforts to counteract slump in popularity of UN. Point to successful continuing UN's efforts in Palestine, Korea and Indonesia and plans for another UN mission to India. Bring out that original expectations of UN achievements had been set too high because of world hunger for solution of international problems, but that in light of present real conditions UN has done relatively well.

Your statement that adoption plan to print 1,000 won notes will definitely and irrevocably eliminate all possibility of a currency conversion this yr has caused some concern here. Understanding here is that one and five won notes of US series already printed plus those which may be printed subsequent to Oct will be adequate for currency conversion early in 49. Do you consider it necessary and urgent that a more immediate solution to currency conversion problem be found? Your advice requested.

Reurad C 61599, 18 Jun. Subj: Potash Procurement.

1. For your info DA now negotiating with World Commerce Corporation of NY for 100,000 m tons potash, 40 to 60% K₂O from Soviet sources. \$45 for 40% and \$65 for 60%, FAS Stettin. Expect contract will be signed as soon as FY 49 funds are available. Corporation has option with Soviet Trade representatives for this quantity. Possibility exists that offer to you is part of this.

2. It is requested that you ascertain whether or not Soviet trade representative has firm commitment for quantity offered to you. DA does not desire 2 agencies be bidding for the same commodity.

3. Rqst advice soonest whether or not in your opinion these offers represent totally different commodities. If you feel this offer is not a duplication, you will be authorized to proceed with negotiations so that contract can be signed as soon as FY 49 funds can be allocated.

Herewith semi-weekly Report Nbr 63 on State Dept (OII) treatment of maj current issues:

1. Berlin situation: In discussing unilateral Soviet currency measures, expose frankly Soviet strategy of trying to complicate position of Western Allies by imposing hardships on Berlin population. Emphasize irresponsibility and at same time, futility of this game; that Western Allies will continue to insist upon validity of 4 Power Rule in Berlin, and that only effect of Soviet maneuvers will be to increase hardships to German population.

2. London accord: In view reports here which indicate that German opposition to London accord is chiefly caused by German reluctance to accept decisions in which they did not take part, point that:

A. London discussions were not a Peace Conference, charged with reaching final settlement. Their main purpose

was to set up a representative German authority with which Allies may deal in future as an interim arrangement until there will be final government, and which will act in German interest within the limitations inherent in the occupation status both in internal and external affairs (EG represent Germany in ERP matters).

B. Due to the status of Germany since the surrender, such a step could only come about by Inter-Allied agreement. London discussions have accomplished this purpose by reaching agreement on establishment of a provisional German government. Restrictions embodied in London recommendations must be looked upon not as arbitrary measures, but as inevitable conditions under which the 6 Allied nations represented at London are willing to consent to establishment of a German government at this time. They are in a way the price Germany must pay in terms of concessions to Allied security interests. Germans must be made to see that these conditions really represent the minimum in the eyes of French and other Nations which have lived under German occupation during the war. While it is matter of political realism for Germans to accept these facts, they should realize that as a result of London, they will now have representative body through which they can express their views and interests.

3. Military aid to Western Europe: Avoid all premature stories of possible military aid talks between US and Western European Nations. Use only official announcements.

4. UN Loan Reports on UN Congress failure to pass UN Building Loan, to extent that their use is necessary at all, should point out that Senate had pass appropriation and that it was in rush of last minute business that House was unable to act. Bring out, however, that Government Corporation Loan has never theless been extended to UN and that construction therefore can get underway even before Congress returns to act on measure.

5. Austrian recovery:

A. In refuting Communist propaganda on US relief and ERP, stress that all funds deposited in special accounts in Austria are to credit of Austrian Government and proposals for their expenditure are to originate with Austrians. Only concern of US is that funds shall be used to benefit Austrian reconstruction and economic stability.

INCOMING MESSAGE

B. Reiterate that ERD through rehabilitation of Austrian industry and commerce, will furnish basis for expansion for Foreign trade, including trade with East. Interest of US in promoting East-West trade is evidenced by efforts to bring about Danube Conference with Austrian participation. Attitude of USSR and eastern Danube countries at conference will demonstrate whether they really desire to promote trade revival for benefit of all concerned.

6. Soviet discipline: All media may find it useful to give good play to Izvestias call for iron discipline on Soviet collective farms.

7. Czechoslovakian Situation:

A. ISB output to Czechoslovakia should expose Communist campaign to undermine reputation for the elder Masaryk as an attempt to undermine things Masaryk stood for and destroy pleasant memories and associations Czechs still retain of "better days".

B. Output also should give good play to resolutions passed by free members of Czech Parliament in London.

8. Hungarian opposition: ISB output to Hungary should give good play to appeals, coming from various members of Hungarian Parliament for observance of Civil Rights Provisions in Hungarian Peace Treaty, particularly last week statement by Sister Schlachta whose welfare should be watched for possible news developments.

9. Korean media should use Points 6, 7, and 8 as illustrations of conditions in Soviet Union and its satellites.

Reurads Jun ZMGNEB 154, Jun ZMBNEB 148 and ourad Jun W 84120.

1. Urad 154 indicates you presume SCAP can furnish add 30,000 tons coal per month to Korea, if funds made available for reimbursement. SCAP has been requested to verify this in ourad.
2. Problem of determining availability of funds, in amount of \$5,400,000, for reimbursement for this request, directly related to facts of situation as described hereafter, and cannot be resolved without consideration of these facts.
3. Before adjournment, Congress passed GARIOA appropriation of \$1,300,000,000 (to include purposes of economic rehabilitation of Japan, Korea and Ryukyu Islands). Consequently, it is obvious that no consideration can be given to requesting special appropriation of \$5,400,000 at this time. GARIOA appropriation, as passed by Congress, is not yet available for analysis by DA and amount have not been apportioned by areas and projects. This is being done and you will be notified as soon as possible. Therefore, it is not known at this time what amount of appropriated funds will be made available to USAFIK for Korea. Urad 154 will be given consideration in this analysis.

4. You obviously now have additional requests for which requests for funds were not included in GARIOA and rehabilitation fund requests for FY 49. This additional 30,000 tons of coal per month and possible extraordinary expenses for repair of power

facilities are examples. All funds for such reqmts must come initially from whatever GARIOA, rehabilitation or dollar settlement funds are made avail to Korea or from proceeds from trade. As indicated above, these amts are not known now. You must decide priority you wish to recommend to DA for these reqmts in relation to other reqmts, if they are to be financed with appropriated funds. DA will give all consideration possible to your recommendations.

5. In view of urgency of your add coal reqmt and situation re funds as given above, it is recommended that you agree to use of, for example,

1. \$350,000 to finance 1st 3 months add coal reqmt, with corresponding reduction in other proj, if reqmts are to be financed with appropriated funds. If you agree, DA will so notify SCAP and allocate funds as soon as avail.

6. After you and DA have had opportunity to study avail funds, decision can be made financing coal reqmts for period subsequent to 1st 3 months (or any other period deemed suitable by you). It is desired to emphasize, however, that it is present opinion of DA that all your reqmts will have to be financed from present appropriations, proceeds from trade, and/or dollar settlements.

7. Regret we can not give you any more assurance than above re your present emergency. We do assure you, however, that we will do everything possible to work out solution to problem.

Reourads WX 84852 dtd Jun; WX 85536 dtd Jul; WX 86204
dtd 21 July; WCL 38865 dtd Jul. Urads ZMGNEB 6430 dtd Jul;
ZMGSCS 201 dtd Jul. Subj is fertilizer for FY 49.

1. In order to place the occupied areas on an equal footing with other countries in fertilizer requirements, full requirements for nitrogen are now being considered. Instead of using the figure of 113,700 tons of nitrogen as Korea's requirement, the figure has now been raised to 136,900 which we are informed is a realistic need. This does not necessarily mean that the requirement will be fulfilled to any major degree, however, it will bring Korea in line, requirement wise, with other countries presently engaged in recovery program.

2. Position FY 49 as seen here in MF N: Requirement 136,920 N. No indigenous production. Imports from US Ordnance 76,500. Imports from North Korea 7,865. Reurad 201, ourad WCL 38865 in error as 110,000 tons is expected production through Sep 49.

3. Congressional action closing days last session requires Army Ord production to provide at least 50 per cent of nitrogen exports to non-occupied areas and in addition 10% of total production of anhydrous ammonia must be made available to fertilizer producers for domestic consumption. This loss for export to occupied areas results in decreasing program from 105,290 tons to 76,500 shown above.

ROUTINE

FROM : DA (FAOA) NR : WX 06352- 24 JUL 48 CONTINUED

- 4. Planned expansion of ord facilities may provide additional 7,700 during latter part FY 49.
- 5. Provided costs can be kept down, expect to be able to obtain approx 8,000 tons N in ammonium sulfate phosphate (16-20-0) and 47,600 tons N in ammonium sulfate during FY 49. This N is part of the 76,500 tons and would decrease ammonium nitrate shipment during FY 49 to approx 80,000 tons.
- 6. Superphosphate position in mtons P 2 O 5; requirement 63,000. No indigenous production. Imports from US, FY 48 funds 8,500; exchange for rock, 4,900; FY 49 funds, 20,000; in 16-20-0, 10,000. From Holland 3,400. From North Korea 2,000.
- 7. Possibility that additional 10,000 tons P 2 O 5 can be procured from US in Oct or Nov.
- 8. Potash position in mtons, K 2 O: Requirement 27,160. From Spain FY 48 funds 9,000; FY 49 funds 10,000. Deficit to be procured from European sources if available 8,160.
- 9. Only possibility of improving Korea's nitrogen position seen here is additional procurement from North Korea. What are prospects of obtaining 100,000 additional tons ammonium sulphate or equivalent from North Korea?
- 10. This radio contains latest information on FY 49 fertilizer availabilities and modifies accordingly previous radios.

Recurad 84132.

On 2 Jun, NY Times carried special dispatch that food situation in Japan is again growing somewhat serious and that ration distribution is in arrears in 17 prefectures. However, in Telecon Nbr 9578 of 4 Jun, arrangements were made to substitute flour for wheat to relieve your milling problem, and I understood your situation was all right. Revised shipping schedule was fwded to you on 16 Jun as WX 84132. USDA has informally approved our shipping program of 688,000 tons of cereals (grain equivalent) from the US to Japan and Korea for the period Jul thru Sep.

Since such Telecon and cable, 5 additional cargoes have been set up as preshipment in Jun against Jul allocation.

I am proceeding therefore, on assumption that your situation is all right. If this not correct, request immediate word as we might be able in emergency to do more due to very recent increased availability of new crop grain accompanied by easing of our money situation, although condition as to availability of ships has tightened.

~~NOTE: WX 84132 is not of record this HQ.~~

Subj is FY 49 GARIOA Budget. Reurad ZMGNEB 148 dtd 9 Jun 48 at the time Dr E A J Johnson was on TDY Wash, he was informed that the figures which appeared in the latest revision of FY 49 budget for Korea were only estimated and would be subj to further revision by Congress. Changes in previous estimates submitted by all areas were necessary in order to fit the requirements within the budget ceiling placed by the Bureau of the Budget. Past experience has indicated that in order to fulfill the requirements for all areas and to meet emergencies as they arise from time to time, it is essential that Food Administrator for Occupied Areas maintain at all times a flexible budget which will permit the shifting of funds within projects and within areas. While it appears that the revised Korea budget has been cut dollarwise from previous estimates submitted, actually provision has been made to fulfill all of the requirements set forth in the original budget estimates. This is indicated in the paragraphs that follow.

(A) Project 113 in the final FY 49 justification provides approximately 4% more food for Korea than was included in the budget justification submitted to Congress when Gen Helmick was in Wash. Food cost estimates have been reduced in the meantime to bring them in line with the lower grade in prices since Feb. The reduction in Korea is therefore one entirely pricing and does not indicate a reduction in supply.

(B) Project 123. Changes in this project resulted in a decrease in nitrogen programmed because total supplies available to the DA decreased by a considerable amount. Super phosphates were not included. As explained in WX 81131, 4 May 48, seeds were eliminated since no requirement was shown and insecticides reduced to reflect the amount shown in import program. Total potash was increased since prospect for obtaining additional quantities now looks favorable.

(C) Project 163 funds are provided in Project 440, FY 49, GARIOA for maintenance of MG motor vehicles. No data here for basis estimate maintenance and/or parts for vehicles mentioned used. Request you discuss this subj fully with Col Binns now en route your comd. Funds for salt for preservation of fish are in Project 530 in the Economic Rehabilitation Program.

Project 413 for FY 48 shows a total estimated obligation of \$4,400,000 for 865 positions. Figures of \$5,722,128 will provide 917 US positions during FY 49 in addition to 3,946 Koreans at an estimated cost of \$1,215,000. Congress will not provide funds for vacant or anticipated positions.

Project 423. Changes in this project reflect recalculation of actual transportation costs and are not in fact a reduction in tonnage to be shipped.

In so far as a reserve fund is concerned against urgent spot requirements, Congress has not seen fit to include reserves in the budget. Spot requirements will be considered same as other requirements and will be handled accordingly.

With respect to payment of coal to Japan, this is the subj of a separate cable.

It is requested that the contents of this cable be shown to Col Binns upon his arrival your comd.

Subject is procurement with GARIOA funds. This supersedes all previous cables on this subject including those listed in telecon of Jun 21. Where in any particular transaction GARIOA procurement can be effected more efficiently by purchasing from Boeki Cho than by Direct Army purchase by P and C officer from original vendor, this may be done in your discretion. Such occasion would arise where Boeki Cho acquires GARIOA items in exchange for exports or soft currencies.

It also might exist where circumstances are such that procurement can be more effectively performed through trade channels than by P and C officer because purchases are made at points or in markets at which he is not adequately represented, or otherwise. In such cases, purchase would be made by P and C officer from Boeki Cho. P and C officer would be entirely separate from and independent of Boeki Cho in all transactions. Purchases from Boeki Cho would be only of items appropriate and necessary for GARIOA program and price would be limited to figure not higher than that at which products of comparable usefulness for GARIOA program could be purchased and delivered if direct dollar procurement had been made. This applies even though Boeki Cho may have paid a higher price. Also we believe that cargo insurance or other incidentals should ordinarily not be added to price GARIOA pays since these would not be part of ordinary Army procurement. Such extra charge may in many cases be eliminated by P and C officer contracting with Boeki Cho to take title at port of origin. All transactions will, of course, be conducted in a manner to conserve appropriated funds and in general accordance with programs for

Reurad Jun C 61462. Cotton "take-out" agreement is subj.
1. CCC monthly statements of acct for months of Jan through May 48 being air mailed this date.
2. Pmt \$5,000,000 for month of Jun recd by CCC. For your info CCC computes interest at end of month. Pmts made during month are not credited to principal acct for interest until end of month at which time interest computed for fol month. Best way overcome this situation favor of SCAP is to pay monthly installment due CCC prior to end preceding month. For example, if 5,000,000 pmt for Jul which is due by 15 Jul is paid by 30 Jun (ie is in hands CCC), 5,000,000 will be deducted from principal acct before interest is accrued for month of Jul as of 1 Jul. Bank making pmt should advise pertinent month for which pmt is being made. Method computation was explained Mr Janow by CCC pers during his TDY Wash.
3. USCC will file claims for damaged cotton upon receipt of out-turn reports being prepared by Adams. Suggest this be expedited and, if you think necessary, pertinent SCAP pers be sent TDY Wash correlate SCAP-USCC cotton acct records.

Herewith Semi-Weekly Report Nbr 62 on State Dept (OII)
treatment of major current issues:

1. German currency reform:

a. Urgent need for financial reform has been gen-
erally recognized by Allied as well as German economists; its
absence has been felt, directly or indirectly, by every Ger-
man as a major obstacle to recovery.

Restoration of a stable German mark is required
to revive normal domestic trade channels, eliminate hoarding
and black marketing, and provide an effective incentive for
production. German consumer will, in time, experience bene-
fits of the reform in guise of increasingly available farm
products and consumers goods. Thus, benefits will primarily
be felt by those, who are not in a position to produce food

CSCAD RO MSG NBR WX 84230 DTD 19 JUN 48 CONTINUED:

or consumers goods, nor can afford black market prices.

b. Many European countries have had to face problem of adjusting volume of circulating currency to shrunken size of post-war production, by means of a drastic financial reform. Everywhere, reform has involved certain unavoidable hardships, particularly losses for people with money savings. There are possibilities of compensating such losses to an extent by spreading burden upon owners of other than monetary holdings. Present reform is not intended to prejudice such a distribution of burden at a later time, which German authorities are free to accomplish by their own legislation.

c. Stabilization of German currency is a prerequisite to any large scale revival of German foreign trade. Since lack of a stable currency would greatly hamper effective German participation in European recovery program financial reform permits of no further postponement.

d. US has for more than two years sought to obtain an agreement which would apply to all of Germany. However, prospects for agreement with the Soviet Government came to an end for time being when Soviet delegates decided to interrupt work of Allied Control Council, body in which negotiations were being conducted.

e. An all German financial reform, in view of US, is an important aspect of economic unification. If and when Soviet Government should decide to agree to enactment of other indispensable features of a unified economic administration for Germany, there will be no reason why financial stabilization measures now effected in west could not be extended to Eastern Zone. In a more general sense, economic improvements which will follow from financial reform in western zones, should be in interest of a unified German economy, if and when Soviet Government should consent to effecting such unification.

f. Urgency of problem prompted occupying authorities to act now, and initiate reform under their authority, rather than leaving it to a provisional German Government. But while development of financial reform through German legislation is not preempted, future German Government is likely to find, that economic improvements resulting from currency stabilization initiated now will greatly facilitate its work.

CSCAD RO MSG NBR WX 84230 DTD 19 JUN 48 CONTINUED:

g. Reform should not be considered as a panacea, but as one, among several essential prerequisites to economic stabilization and recovery.

2. Position of Berlin:

a. While Berlin is now experiencing certain consequences of fact that Soviet policy to date has prevented one part of Germany from joining in common policies of stabilization and recovery initiated in the other zones, make it clear that none of the new arrangements applied to West will cause US to change its position that Berlin is under four power control.

b. New measures for three western zones, including financial reform and results of London Conference are designed to expedite stabilization and recovery in Western Germany. There will be no difficulty in extending common economic policies to all of Germany if and when a change in Soviet position should make this possible, nor will US permit that these measures shall have any bearing on basic agreement for four power control of Germany.

c. Reiterate emphatically that in light of this position Soviet moves aimed at undermining position of three western powers in Berlin can have no other effect than to imperil peaceful international relations, render more difficult ultimate unification of Germany and disturb the peaceful recovery of the people of Berlin.

3. Political conventions:

Coverage of US political conventions should be as complete as possible, keeping in mind that to overseas audience, American election and attendant developments are major news items. At same time conventions furnish excellent opportunity to show democracy in action. While it is impossible to go into all details of convention procedure, effort

PRIORITY

CSCAD RO MSG NER WX 84230 DTD 19 JUN 48 CONTINUED:

should be made to show importance of "off floor" discussions and planning, rather than concentrating only on the "big-show" playing on the floor of the convention hall. In describing platform adopted by convention, keep in mind that to Euro-
pean, a party platform means a definite party program actually to be carried out once party assumes power; while under American system it is merely a general plan without any commitments to voters that it will actually be put into effect in its entirety. Chief interest for overseas audience will of course, be centered on foreign policy aspects of convention. In this connection guard against undue stress on picturesque isolationist speeches which are part of the convention, but which do not reflect majority party opinion. Similarly, avoid presenting any particular aspirant to the candidacy as being associated with a definite type of foreign policy. Thus, if Vandenberg should withdraw, do not present this as indicating a defeat for republican foreign policy as represented by him. On other hand point out that if any of the other aspirants become candidates, Vandenberg will continue as Chairman of Senate Foreign Relations Committee and will thus continue to exert influence over republican and democratic foreign policy ideas.

4. Displaced persons:

While ISB output to satellite nations should, of course, give good play to displaced persons legislation as passed, it may be just as well to emphasize that appropriation for execution of program still has to be made.

5. Economic report:

Media may find it useful to play the annual report of Bank for International Settlements in Geneva, which noted how Soviet monetary policies during last 30 years have paralleled those of western states.

6. Japanese demobilization:

In connection with SCAP announcement that demobilization of Japanese forces has been virtually completed, point out that all that remains to be done is to repatriate and demobilize Japanese servicemen in areas under Soviet control. This might be used as a further peg for stressing Soviet delays in repatriating Japanese prisoners of war. Korean

Reurad C 61460. Entire responsibility for regrettable delay in giving you firm authorized procedures is mine. This was caused by development of unexpected difficulties and uncertainties as to what the 2 Appropriations Committees would approve in utilization of GARIOA funds. This was finally clarified as practical matter only day before yesterday. While it is even yet not official until Relief Act is passed, we now believe that a clear basis has been finally developed which will solve your problems.

The subj, including the many cables, is so complicated that I believe it would be better to discuss it initially in telecon and to send official cable of authorization only after such discussion. Requesting telecon for Monday and will be personally present as one of conferees.

DECLASSIFIED PER DA CIRC. #127
23 DEC. 52

Hawaii-Japan-Korea tour of Major League All-Star Baseball Team is subj. Congressman Melvin Price of Ill., member Committee on Armed Svs, has inquired in behalf of Charles DeWitt and Fred Hoffman, Secy and Coach St Louis American League Baseball Club, as to possibility of taking All-Star Team from both maj leagues to Pacific areas end of current season. DeWitt and Hoffman annually assemble gp of maj league stars and tour country at close of season on exhibition tour. Will do same this year with reg tour terminating west coast. They propose taking this gp of maj league All-Stars to Pacific "For a series of games in Japan and other areas, where mil and mil govt officials believe there might be entertainment needed for troops and for the morale of people in the occupied zones."

Congressman Price has asked DA to "Explore the possibility of official spl of such a trip, and also the possibility of the Army's furnishing transportation to such a group to Hawaii, Korea and Japan."

His ltr says, "The latter, I feel will be necessary because of the present yen situation in Japan. It is not the hope of the gp to make any great financial return on such a trip, but they would receive their own repnt for sv through the nature of the trip itself. However, it might be that they could obtain some return through games in Hawaii en route."

This inquiry is exploratory and for the purpose of determining theater attitude in advance of DA giving matter further consideration.

1. PL 454, 79th Congress provides articles or svcs furnished shall be within limits of specific appropriations or limited to items surplus to US needs

2. No objection to establishment of Philippine Procurement Office in US for purpose of purchasing mil type items for Philippine National Defense Forces. Under existing statutes and executive orders it does not appear that office may legally utilize US mil procuring agencies in the manner set forth in our ref ltrs and cables. However DA will render that office every authorized assistance.

3. When such an office is established it is suggested proper presentation be made the Dept of State after which their duly authorized representatives contact the Liaison Br Intelligence Div, DA. The Liaison Br will arrange necessary contacts with Dept of Army Tech Svcs familiar with type of supplies or equip to be procured. Procurement for Philippine National Defense Forces can then be effected by individual contracts between the Philippine Govt and the manufacturer.

Herewith Semi-weekly Report Nbr 61 on State Dept (OII)
treatment of major current issues:

1. London discussions on Germany:
German media should refrain from any speculation
concerning revisions in London accord on Germany.
2. Berlin situation:
German media should bring out that Russians, with
their present Berlin tactics, are causing considerable
hardship to German population and are inhibiting recovery
of German industry. Thus, in their efforts to eject western
powers, they are guilty of actions directly contrary to their
professed interest in German recovery.

3. ECA appropriations:
Connection with Senate's restoration of most of
European Recovery Program funds (bill now being considered
by Conference Committee), it may be good Americans to
point out how expressions of popular opinion directly to

Congress and through newspapers and radio helped to impress members of the Legislature that American people are interested in lending all efforts to speed up European recovery. Popular feeling was thus reflected in governmental action.

4. Danubian Conference:

STRAIGHTOAY is recommended for Soviet acceptance of Danubian Conference proposal. Avoid any speculation as to why Soviets are opposed to Belgrade as site for conference. Austrian media should emphasize that it was through US effort for full Austrian participation that Austria was given opportunity for at least limited participation in conference.

5. Czechoslovakian developments:

Point out that assumption of presidency by Gottwald and premiership by another Communist, constitutes another big step in "totalitarianization" of Czechoslovakia. Literary purge, reminiscent of similar purges in Germany and Soviet Union, is further evidence of this. Korean media should point to events in Czechoslovakia as example of what happens to states that become Soviet satellites.

6. Korean developments:

A. Do not construe any statements by UN Commission as constituting official approval or disapproval of May 10 election, unless statement is an official announcement specifying such a decision.

B. In connection with Hodge letter released Jun 15 point out that although power has been shut off by North Korea, American attempts to make payments have not stopped; but on the contrary goods for such payment are piling up and only wait to be picked up by North Korean authorities. To emphasize deliberate obstructionist character of North Korean action, stress General Hodge's long standing but to date unspoken offer to settle remaining balance in full or in part with American dollars.

South Korean power situation is subj.

1. Ships and Power Equip Corp of US has written DA for info which is summarized hereafter:

A. Ships and Power Equip Corp has avail mbr of diesel engines and generators which, installed in LST, or similar type vessel, would make floating power station capable of generating output of 111,000 kw. This could be operated at either 50 or 60 cycles on 3-phase and run to synchronize with current from other sources. This floating power plant would have storage tanks for fuel or lubricating oil necessary for operation, and living quarters for operating crew. It is estimated that this vessel, ready to sail, would cost less than \$85 per kw. Further, unit could be furn ready to sail from NY Harbor within 4 months after receipt of order, and could be placed in actual sv within 6 months from date of order. Units mentioned are rebuilt and put into 1st class working order under supervision of former manufacturers' factory engs and mechs. Approx cost \$920,000 RCB NY Harbor.

2. Survey Commission, under Mr Gincou has this info and will consult with you on both this matter and offer made by A G Schoemaker upon his arrival in South Korea.

Effects Soviet Berlin Policy since Mar have been to:

A. Confine movement US personnel in and out Berlin largely to Air.

B. Restrict movement US records equipment and personal belongings out of Berlin to Air Carriage.

C. Practically eliminate shipments by German individuals and firms from Berlin to western zones.

D. Terminate effectiveness remnants quadripartite administration German.

E. Curb dissemination US propaganda to Soviet Zone.

F. Reduce collection information from Soviet Zone.

G. Impair US prestige. Soviets with occasional brief lapses continue permit entry, by rail highway and canal of food and other supplies for Western Allies personnel and German population Western Allies Sectors Berlin. Principles of Soviet regulation and inspection military cargoes passing through Soviet Zone to Berlin preserved but not exercised.

Possibility Soviets may not exert full pressure to oust Western Allies from Berlin because.

A. Soviets fear precipitating conflict with the US.

B. They prefer Western Allies leave Berlin voluntarily rather than compulsorily in order to place full blame for break-up quadripartite administration on Western Allies. Soviets probably awaiting result French struggle over proposed government Western Germany before making next move with respect to Germany.

Desultory firing in northern area Palestine after cease fire deadline has stopped according to latest reports. Truce currentl., effective. Sentiment in favor compromise

Reourads Jun WX 83488 and Jun WX 83489. South Korean power survey is subject.

Part 1. Fol is ltr of instructions, furn Chief Engrs by Under Secy Draper, covering study to be made by Survey Gp leaving Wash for Korea 15 Jun:

"Dear Gen Wheeler:

Reference is made to your ltr of 4 Jun 48, to the Chief, Civil Affairs Div, concerning the power survey to be made under direction of Mr C H Giroux of your office.

"There are outlined herein the various phases and aspects of the power problem, now existing in South Korea upon which it is desired Mr Giroux and his gp report to me through your office. Previous reports, copies of which have been furn Mr Giroux, outline the gen scope of the power generation problem in that portion of Korea south of Parallel 38 degrees.

"The immediate problem is that resulting from the action of the Soviet Mil Forces in North Korea in cutting off the power sup, presumably in an effort to embarrass and harass the newly-elected South Korean Govt. This Sov action on 14 May, resulted in the loss of an avg of 60,000 kw of the avg daily minimum reqmt of 100,000 kw.

"The immediate interest of the US is that of securing add firm power generating capacity in South Korea sufficient to replace that lost from North Korea. This must be accomplished by increasing the efficiency of existing facilities and by supplementing them to the extent practicable. It is desired, therefore, that the Survey Gp study and recommend upon the fol:

"1. Increasing the output of existing steam generation by such repairs and improved maintenance as are required on both an immediate and on a long term basis.

"2. Increasing the output of existing hydroelectric generation plants by such repairs and improved maintenance as are necessary on an immediate as well as on a long term basis.

"C. Rehabilitating and repairing such dams, and other hydroelectric structures as may be practical within the time limits given below.

"D. Improving the utilization of existing water sups to secure maximum firm power output by such measures as can be readily effected.

"E. Increasing the fuel sup and improving the fuel handling facilities, especially at the Yong Wol Plant. This should include increasing the output of coal mining activities and improving transportation from the mine to the steam plant.

"F. Improving the distribution of existing power, if possible, to eliminate transmission losses, uneconomical distribution, etc.

"G. Supplement existing generating capacity by a fuller utilization of the power barges Jacona and Electra, now on loan to the Mil Govt of South Korea. The possible use of add floating plants such as the above also should be studied.

"H. The need for, and specifications for, such diesel or similar type small installations as may be required to sup essential needs of those areas, formerly supplied directly from North Korea, that are not now tied into South Korean distribution nets or are in need of add prime power.

"Three further factions must be given cognizance:

"A. The time required to complete the recommended improvements.

"B. The immediate availabilities of the necessary materials.

"C. The estimated cost of add sups and construction in excess of that now under way.

From the standpoint of time, it is desired that spl consideration be given to that work which can be completed on or

before 1 Dec 48, as well as that which will require a longer period, or will continue into the period for the withdrawal of American Mil Govt. Secondly, availability of materials will, in many instances, limit the rehabilitation that can be accomplished. The study and recommendations should, however, contemplate the maximum utilization of indigenous resources. Thirdly, the gp should determine as rapidly as possible the status of sup of required sups from Japan; moreover, any needs add to those already on order from Japan and the ZI, together with the estimates of cost, should be determined and reported to the .CAD by rad in order that appropriate sup action may be initiated without delay. With respect to the cost of add materials and construction, it must be borne in mind also that FY 49 funds have not been appropriated for Korea and, consequently, it is not known what money, if any, may be avail for expenditure in Korea.

"It is anticipated that the svcs of Japanese technicians, who participated in the construction of the South Korea power facilities, may be avail for consultation if so desired. Gen MacArthur and Gen Hodge have been advised of the possibility of using these Japanese technicians and, should their svcs be desired, it is requested that Mr Giroux so inform Gen MacArthur's Hq. Gen Hodge has been requested to assume full responsibility for the safety of any Japanese who go to Korea since they will need protection from Korea agitators.

"Gen Hodge has been requested to give every assistance to the Survey Gp in the preparation of their report. The findings and recommendations should be discussed fully with Gen Hodge prior to the departure from Korea and copies should be left with him. A copy of the findings and recommendations also should be left with SCAP Hq in Tokyo. No date for completion of your report is set but it is requested that every effort be made to meet a 1 Aug date-line for completion of the gp's work."

Reur C 61253. Subj soybeans. Concur in not cancelling contract for 10,000 mtons with Central Trust of China. Balance of \$2,080,000 from FY 47 can be reobligated up to May 19, 1949. However, earliest reobligation of these funds is highly advisable. Re Para 3 yourad it is considered essential \$710,000 of the \$2,080,000 from FY 47 funds be utilized against the present contract for 4,000 tons of soybeans from Java and that the FY 48 funds allocated for this purpose be withdrawn. It is also considered advisable that you use the FY 47 funds for the purchase of add 3,000 tons from Java mentioned in your Para 4.

Opinion here that it would be difficult to justify obligating FY 48 funds for soybeans when \$2,080,000 of FY 47 funds is still avail and could be used for this purpose. Therefore suggest you utilize avail FY 47 funds for the purchase of the 2 lots of soybeans from Java and utilize the balance of these funds to purchase add peanuts from China. Such use of FY 47 funds must be in accordance with the restrictions imposed by the Office of the Army Comptroller and cited in ourad W 81363.

It is possible that we will be able to arrange with Dept of Agriculture for preshipment of flour allocated for Jul in Jun. In order to do this, we need all avail FY 48 funds to pay for such cargoes as may be preshipped. Therefore, your concurrence in withdrawal of the above mentioned \$710,000 for Fiscal Director REC is reqstd.

Procurement of sugar is subj.

1. DA has been advised by Wash representative of NY firm that Atlas Corp of Tokyo has made contract with Mercantile Serla Do, Sao Paulo, Brazil, for 30,000 tons sugar to be delivered at price \$150 to \$160 per short ton CIF Japan. Atlas Corp has apparently been advised that all sugar procured for occupied areas is purchased through Dept Agric and therefore requesting DA assistance on this contract.

2. If this sugar being purchased on basis of contract between Bozicho and Atlas Corp, using proceeds from export, no assistance from Army required. However, it is difficult to understand this purchase in view of 400,000 tons of sugar being provided Japan by DA through Agric from GARIOA funds. Complete re contract referred to, if one exists, is requested, including info on end use for which this sugar is intended.

3. If firm contract does not exist, suggest it would be advisable that purchase of this sugar be tied in with other sugar purchases being made by Army through Agric for Japan, as this method would provide best possible price and insure securing most advantageous contracts in all cases. CIF price referred to in Par 1 above is high in relation to present world price of sugar.

CSCAD RO MSG_NBR_WX 83732 DTD 13 JUNE 48 CONTINUED:

the Soviet zone in standing apart. Bring out that unification of Germany would require of the Soviet zone to bring its policies in line with those of the new union (by eliminating inter-zonal barriers, promoting inter-zonal economic cooperation, reinstating civil liberties, etc). Point out that if Soviets were sincerely interested in unifying Germany, they would recognize the accomplishment of these first steps towards union and would join with majority of German people, rather than proceeding with policies that will only serve to perpetuate the division. With its continued "national unity" propoganda, the People's Congress will soon find itself in a situation which is reminiscent of the Army recruits complaint that the whole company is out of step except himself.

D. In reply to Soviet charges that the Rhur is coming under "foreign regime" contrast the Rhur arrangement (in which Germany will retain ownership, continue to operate production, and have a voice in international control authority regulating allocation) with the status of German industries in the East under Soviet corporations (K & Krupp's as opposed to Zeiss). Refer to Vienna International Socialist Conference resolution favoring international control of allocation of Rhur output and viewing this as a pattern to be followed with respect to other European key industries.

2. East-West trade:

All European media should make every effort to show US interest in East-West trade as a major factor in furthering European recovery.

3. US draft legislation:

Straight reporting is recommended for US draft legislation which still has to be passed by House of Representatives. Be sure to point out, however, that provision for foreign enlistments does not mean establishment of a "foreign legion" in US Army, but that the alien enlistees would be distributed as individuals in regular units throughout the Army. Do not use term "foreign legion," and guard against exaggerating foreign sentiment for enlisting in US Army.

4. Displaced Persons Bill:

ISB output to satellite nations should give good play to House of Representatives amendment for admission of political refugees from Czechoslovakia, Hungary, Poland and other Soviet satellite nations. Senate, however, still has to act on this

CSCAD RO MSG NBR WX 83732 DTD 13 JUN 48 CONTINUED:

amendment.

5. Baruch article:

Bernard Baruch article in Saturday Evening Post, (copyright clearance has been obtained for VOUSA use) is highly recommended as excellent projection of US attitude on international affairs.

6. US political campaign:

Good coverage is recommended for US political campaign, particularly after the conventions, but is not necessary to stress charges and counter-charges by the various candidates which, are primarily of domestic interest and if removed from their American milieu, might well cause consternation. (For instance current exchange between Truman and Congress).

7. War crimes trial:

ISB output to satellite nations should give good play to prosecutor Taylor's statements at Nuremberg I G Farben war crimes trial on 10th. Japanese media might find this useful as preliminary material in preparing for forthcoming Tokyo war crimes verdict.

8. Palestine:

During Palestine truce, caution is recommended against unconfirmed stories of violations which will probably crop up.

sell or otherwise dispose of such items of equip (in accordance with existing laws) to the Korean Govt, Surplus Declaration Forms (used in the sale of surplus property) should be prepared immediately and retained for use in such event.

4. With exception of items listed in Para 5 below, the supply of items required fr XI sources is approved as recd. (Re Para 1, B above). Reqs for approved items required fr XI may be initiated citing this msg as auth.

5. Excepted items which are not spd pending action indicated in ea instance are as follows: (Item now cited below refer to inclosure Nbr 4 to ltr, re Para 1, A above).

A. Engr Item Nbr 39: "Compass, lensatic, luminous dial" is in critical short supply and is not available fr DA stocks. Recommend substitution of item "compass, wrist, induction lamp."

B. Ord Items Nbr 3, Nbr 41 and Nbr 42: "Binoculars, M 1 type," "watch pocket 15 or more jewel," and "watch, wrist, 7 to 15 jewel" would appear to be in the cl of "luxury items." Recommend resurvey of basis of issue of these items with the view of adequate justification of, or a reduction in quantities required.

C. Ord Item Nbr 20: "Howitzer, 105 mm, M 2, high carriage M 3 or carriage motor, 105 howitzer M 7" is not considered essential to the mission of the South Korean Constabulary and therefore is not spd for issue. Recommend this item be deleted.

D. Ord Item Nbr 58: "Truck 1 1/2 ton, 6 by 6, F and C" is not available fr DA stocks. Recommend that shortage of item be made up fr stocks available in Korea of items "truck, 3/4 ton, 4 by 4, weapons carrier," "truck, 2 1/2 ton, 6 by 6, LWB," or "truck, 2 1/2 ton, dump."

E. Ord Item Nbr 79: "Quadrant, range M 8" is in short supply. Approx 50% only of Korean reqmt can be furnished fr DA stocks. There is no substitute which is suggested for this item.

F. Ord Item Nbr 61: "Truck, 2 1/2 ton, 6 by 6, Sig C 300, M 30" is available but in a not-ready-for-issue condition. Recommend shortage of item be made up fr stocks avail in Korea of other type vehicles as recommended in Para D above.

G. Sig C Items Nbr 76: "Rad Set SCR-284" is an obsolete item and is not avail fr DA stocks. Recommend the item

TO : CINCPAC (PASS TO GEORGE POLLARD NOW TRY YOUR HQ)

NR : W 83502

Re Jun ADIT 9554 FEC Item 20 and cured Dec W 92115, used Jun C 57905. (1) Jap patents and (2) German property in Japan are major.

1. Re FEC Item 20 A (1) Text of policy statement on treatment of Japanese domestic and foreign patents as currently before SANACC is set out in SANACC 369/1, which represents revision of conclusions of SANACC 369 to accord, as far as possible, with SCAP recommendations in 1st Ind AG 072 (21 May 47) C12/PP fr GHQ SCAP dtd 26 Jul 47, and to eliminate those features of SANACC 369 which overlapped into field of decartelization and reconcentration.

2. Re FEC Item 20 A (2) Conclusions of latest paper on disposition of German property in Japan (SANACC 255/23) were sent SCAP in Dec W 92115. Subsequently, and in light of SCAP comments, Jun C 57905, Paras C (2) and C (3) W 92115 have been reconsidered and are proposed to be amended as below:

A. SANACC 255/24 proposes amendment Para C (3) W 92115 to read as follows:

"Patents in Japan of Oct A Germans should, for the time being, be made avail for use in Japan by grant of temporary licenses revocable at will by SCAP at any time. Unless exceptional circumstances clearly dictate otherwise, such temporary licenses should be non-exclusive and royalty free."

Reasoning which supports foregoing amendment is briefly as follows:

One of chief benefits of London Patent Accord is right which it accords (Part 3) to each signatory to import articles produced by German patents into another signatory country without bar imposed by latter through control of former German patents within its jurisdiction. By terms of accord, this benefit is limited to signatory countries and to date such countries in pre-

~~CONFIDENTIAL~~
PRIORITY

FORM : DA REF : W 83502 11 JUN 48 CONTINUED:

here shows little disposition to extend this privilege to articles produced in occupied areas, Japan and Germany. Retention of control in SCAP of German patents in Japan, including power to exclude imports of articles produced by use of inventions covered by these patents, enhances SCAP's position to bargain in behalf of re-entry of Jap exports into world trade. Voluntary application of London Patent Accord treatment at this time as previously proposed, (Para C 3, W 92115) would deprive SCAP of whatever bargaining advantage derived fr his control of these patents. Amendment outlined above is designed to preserve SCAP's control of former German patents for time being while making them avail for immediate use locally within Japan. Par A. SAKMCO 295/25 proposes amendment of Para C (2), W 92115 to read as follows: "All the

"Trade-marks (including trade names) of category 'A' Germans which are associated with products manufactured in Japan and which are of purely local (ie Japanese) significance may be sold together with the associated businesses. Those trade-marks which are associated with products manufactured in Japan but whose significance is not purely local should not be sold for the present; except as otherwise provided in present valid license agreements. Use of these latter trade-marks by present users, or their successors, may be permitted for the time being but only on the basis of licenses revocable at will by SCAP at any time. All other trade-marks not associated with manufacture in Japan should be retained for the present and their use prohibited."

Foregoing amendment designed to meet as far as possible SCAP's comments in Jan C 57305. To some extent considerations set forth in Para 2 (B) above, are also applicable Par 3. Re FBO Item 20 B. As indicated in SAKMCO 295/23, disposition of German property in Japan would be regarded as matter for consideration by US, UK and France, Ultimate German Govt. disposition these assets. Previous suggestions that German assets in Japan be released generally to Japanese Govt have met with disfavor here. Appropriate sales to Jap indivs or govt for gen. not precluded, however.

Recognized that properties described in FBO Item 20 B may not be salable except for gen. For your info, indications here are that US, British, and probably French, are very interested in

Recurad May WARX 81901 and urad May ZGCG 671. Engr power survey in South Korea is subj.

1. Survey gp referred to has been selected and under present plans will depart Wash for Japan and Korea on 15 June for purpose of conducting study and preparing report on possible measures to expedite rehabilitation of South Korean power generating capacity. Gp consists of 7 highly qualified engr from several fields involved in any rehabilitation of existing facilities.

2. As noted below, this gp consists of top-flight engr from govtal and pvt fields and should be given status of VIPS in facilities provided them. Short time avail to them for making their study and reporting their findings makes it imperative that carefully planned course be worked out prior to their arrival. They will, of course, need adequate office space, trans, interpreters and secretarial assistance competent to do tech work involved. Suggestion has been made to engr in charge, Mr Giroux, that should he find it desirable, Japanese technicians who assisted in original construction might be made avail from Japan if they can be located. They would be sent to Korea only with understanding that their safety would be assured and it is presumed that you would be in pos to provide such safeguarding.

3. Gp will take from ZI full info on procurement status and shipping schedules on those sups being furnished from US. Anticipated they will be in South Korea approx 4 weeks and will desire to spend 5 to 7 days in Japan on return trip to check on procurement status and delivery schedules of equip being supplied from Japan.

NR : WX 33566 BOOK MSG (TRUE TOO 101743 Z)

1. Separate Army-AF budget directives have been published by the respective depts to the Senior Fld Comdrs of ea Dept. These provide detailed instructions for the preparations of estimates FY 50. The completed estimates will be submitted CSUSA, CSUSAF, respectively, attn the respective comptroller, through the unified comdr for all overseas comdrs except Hawaii. In this case the senior Army or Air comdr is designated in lieu of the unified comdr.

2. In order that provision may be made for Army-Air Reqmts for unified comd hq and that a coordinated prog may be presented the following action is desired:

A. Review of estimates: The unified comdr, except in Hawaii will screen estimates as submitted to insure a coordinated program and to prevent overlap or duplication. He will recommend to the DA and Dept of the AF respectively, ants to be apd for ea dept together with necessary explanations.

B. Unified hq Reqmts: The Dept (Army or AF) providing the unified comdr will budget for this reqmt in accordance with instructions issued by that particular dept.

TO : SCAF

NR : W 03536

Reur C 61005, FY 49 Budget provides \$250,000,000 for the procurement and transportation of food for Japan (excluding Ryukyus). Budget has been passed by House and Senate action expected next week.

Assuming no reduction in Senate, this should provide approx same tonnage of imports during FY 49 as received by Japan in FY 48. Increases in ration distribution will therefore depend on Japan's ability to increase food production and collections.

There should be no basis for request for supplemental appropriation in FY 49, unless unforeseen price increases or crop failures occur.

Recommend therefore that increase in supplemental ration suggested would be restudied in view of budget prospects. If still considered feasible, suggest exploration of following possibilities:

A. To hold basic ration at current level and divert increased supplies to supplemental feeding;

B. Financing necessary increase in supplies from proceeds of exports or through barter arrangements.

The Australian Dept of External Affairs has protested thru Embassy Canberra, with reference to removal certain American and Filipino personnel from New Guinea following an Australian Civil Court trial involving the homicide of one John Scott at Lee New Guinea. Dept of External Affairs alleges that following dismissal of homicide charges against Philippine Scout by an Australian Magistrate Australian Administration appealed decision, that Australian authorities made written request to US authorities to hold accused and all necessary US witnesses pending result of appeal, that Major Merrit, an American Army officer, was a principal witness at trial, and that senior officer of US Army courts-martial when in New Guinea had already given an undertaking to effect that Major Merrit, all necessary witnesses and accused would remain at Lee until case was disposed of. Dept of External Affairs further alleges Major Merrit received instructions to return to Manila and departed from Lee, with 8 Philippine involved, about 16 Mar 48. Dept of External Affairs also states that Australian Govt is not satisfied that incident involving the homicide has been properly and fully dealt with, and Australian authorities are of impression that they have been impeded in exercise of rightful jurisdiction. Dept of External Affairs requested answer to 2 questions:

1. Whether course followed by US Army authorities at Manila and at Lee has concurrence of US Govt?

2. Whether it is proposed to bring accused to trial under US jurisdiction or return him and necessary witnesses to jurisdiction of civil courts of Papua New Guinea?

DE (JAGJ) NR : W 83599 DED 10 JUNE 48 CONTINUED:

State Dept has transmitted Australian protest to Secy of Army stating action of Army authorities in removing personnel in question from Lee without prior consultation with State is not understood. State Dept proposes unless there be important reasons unknown to it for removal of the personnel from Lee, to inform Australian Govt that action of Army authorities in this matter is not concurred in by US Govt and that accused and witnesses should be made available for return to New Guinea if return of accused to New Guinea for trial is desired by Australian Govt.

MX 85957 dtd 16 Feb 48 recommended any further negotiation of question of jurisdiction be made by PHILRYCOM and Australian authorities in New Guinea.

Request priority rad reply as basis for reply by Secy of Army to State covering in detail:

A. Commitments, if any, by members of PHILRYCOM to local Australian Govt either before or after filing of Australian appeal that personnel involved in Scott homicide would remain in New Guinea until case was disposed of. If commitment was made, whether same covered period through trial by magistrate only or covered appeal period as well.

B. Disposition made of charge against Filipino suspect by Australian Magistrate and reasons for such disposition.

C. Objections, if any, filed by local Australian officials against personnel involved departing from Lee. Also any local Australian official concurrence in such departure.

D. Info as to whether accused will be brought to trial by courts-martial for the homicide.

E. Info as to whether accused, Major Merrit and other witnesses deemed necessary by the Australian authorities and the defense are available for return to New Guinea should Australian Govt request accused be returned for trial.

F. Info as to Army authorization granted for removal of personnel from Lee.

Herewith Semi-Weekly Report Nbr 59 on State Department (OII) treatment of major current issues:

Firstly. Western Powers versus Soviets:

A. In pointing out differences between life in Western Nations and Soviet Satellites, cite such items as French agricultural production now within 75% of prewar figure and meeting of Benelux Ministers to plan future economic cooperation as compared to continued dismantling of factories by Soviets in Eastern Germany and Soviet failure to return 1/2 million freight cars which were used in the move.

B. Good play should also be given to strong stand taken against the one party state by the Socialist Conference in Vienna. Note conference statement that so called People's Democracies betray both Democracy and Socialism which they claim to represent.

Secondly. ECA appropriations:

Factual coverage should be given to Senate hearings on ECA appropriations, stressing particularly sentiment towards

restoring cuts made by House. At same time, however, guard against overoptimism and bring out that program will continue even if original sum is reduced.

Thirdly. Benes Resignation:

Besides stressing the reasons for Benes's resignation, as opposed to pretext of ill health, point out that Benes did not sign New Czech Constitution.

Fourthly. Hungarian Pastoral Letters:

ISB output to satellite nations should give good play to Hungarian Pastoral Letter directing Catholics to refrain from reading government controlled newspapers and listening to Hungarian radio (US editorial comment on this sent in CAD-CANS newsfile on 9th)

Fifthly. Korean Developments:

A. Do not pick up statements by individual members of the UN Commission in Korea unless they are official and are made in name of entire commission.

B. Avoid using Pyongyang Radio Reports of Soviet troop withdrawals from North Korea until reliability of broadcast has been established. Even if confirmed, this development should not be given undue emphasis.

Reourad May WX 81901 and urad May ZJCG 671. Engr power survey in South Korea is subj:

1. Survey gp referred to has been selected and under present plan will depart Wash for Japan and Korea on 15 Jun for purpose of conducting study and preparing report on possible measures to expedite rehabilitation of South Korean power generating capacity. Gp consists of 7 highly-qualified engr from several fields involved in any rehabilitation of existing facilities.

2. Contemplated that gp will go direct to Korea, stopping in Japan only sufficiently long to determine whether or not they will need svs of Japanese engr who may be familiar with background and techl details of South Korean installations. On return trip, it is anticipated that grp will want to stop in Tokyo for not to exceed 1 week for detailed checkup on status of, and delivery schedules on electrical equip being supplied from Japanese sources.

3. In view of urgency of situation and in view of speed with which grp must work, requested they be given every assistance possible in providing desired info on procurement and shipping status and, if desired, svs of any Japanese engr. Suggest that these data be compiled immediately so as to be avail to gp on their way to Korea.

4. Gp will consist of fol:

French Parliamentary debate on 6-Power Plan for future Western Germany marks crisis in European affairs. Informed observers believe plan has chance to pass by narrow margin despite savage criticism by extreme Left and Right. Provisions for thoroughly adequate protection of future French security from German aggression should become apparent to majority necessary for passage as debate progresses. Socialist leaders reluctant to overturn Schuman govt. Action of Gaullists difficult to anticipate.

Communists' blasts denouncing 6-Power Plan may be followed by formal Moscow request for Allied evacuation Berlin on grounds quadripartite control completely terminated. Recent tightened border control, drastic restrictions imposed on movements Western Allied pers and disappearance last vestige effective functioning quadripartite bodies in Berlin in addition to previous Soviet measures have practically converted Soviet Zone Germany into Soviet territory.

Markos' peace feelers in Greece resemble recent so-called peace offensive of Soviets. In both cases rejection enables Soviet propagandists to depict opponents as aggressors and enemies of peace. Peace offensive of both Moscow and Markos may represent expedient to reach temporary settlement of differences with adversaries on terms conducive to ultimate achievement Soviet objective. Greek National Army after successful operations in Roumeli area are now regrouping for further action against Guerrillas.

Israelis and Arabs apparently working towards acceptance UN proposal 4-weeks truce with chief stumbling blocks continued immigration and Jewish insistence that issue of independent

In view of criticism presently in Daily Press in China especially Shanghai it has been suggested to CSPID desirability of inviting Woo Kyatang, executive editor, American owned Shanghai Evening Post, to come Japanward for visit. Woo is an able and competent editor and could write a special series of articles which could be effective to counteract growing Chinese criticism of US policy in Japan. Randall Gould, Post Publisher, will permit Woo to come Japanward. State Dept consulted here and they support suggestion as meritorious. Your views and comments will be appreciated by CSPID.

8 JUN 48

FROM : CSCAD 800N

TO : SCAP

NR : W 85531

DECLASSIFIED PER DA CRC #127
23 DEC 53

Reurads Dec C 57264 and May C 60701.

1. Re Item 127, quebracho extract, and Item 128, wattle extract, Para 1, Part 1, urad Dec. GARICA funds in amt \$1,216,607 were allocated from Proj 162 in Jan 48 to finance PAs procurement of 4,199 mtone of quebracho extract and 1,900 mtone of wattle extract at estimated FOB procurement cost of \$210 and \$155 per mtone respectively. Three invitations to bid, 2 of which were rejected, 3d of which is being held in abeyance, have revealed that price of quebracho has been artificially raised to \$280 per NLF, and that of wattle to \$285 per NLF. Consequent to these price rises, tanning industry has ceased purchasing in effort to force price reduction. DA is in agreement with industry's POS and does not want to take any action which would be detrimental to industry's objective. DA is concerned also with meeting SCAP's rights and insuring obligation of \$1,216,607 prior to 30 Jun 48. Therefore, SCAP's comments on fol proposals desired accord:

A. That, if SCAP has immediate and essential minimum requirement for quebracho and wattle, DA procure it now at present price. DA does not favor procurement of more than 1,000 NLFs of ea commodity at this time and that, only if absolutely necessary. Remainder of quantities originally requested might be procured during FY 49 on passed procurement schedule, to be financed with whatever FY 49 funds might be avail for that purpose.

B. That SCAP attempt procurement of wattle or acceptable substitute in Far East.

C. That both subpara. A and B above be effected concurrently.

B

FROM : CSCAD BCCN

TO : SCAP

NR : W 83269

DECLASSIFIED PER DA CIRC #127
23 DEC. 53

1. Re recent visit to Japan in Mar and Apr of a representative of Natl Research Council, Dr Philip S Owen, and his efforts to negotiate suitable arrangement for svcs and commodities in connection with contemplated studies at Hiroshima of effects of atom bomb on man. It is understood that these negotiations were not concluded satisfactorily because of gen belief in SCAP Hq that svcs and facilities to be made avail at yen cost should be based on 50 yen to dollar ratio.

2. Research proj is of utmost importance to Us in natl defense implications contained therein. Because of its great importance to our future natl welfare, AEC is providing funds for long range research program in amt of \$1,850,000 of which \$344,500 is earmarked as cost of facilities and svcs to be secured in Japan during pd ending 30 Jun 48 and is earmarked also from funds which must be contractually obligated before 30 Jun 48. It is estimated that at least \$150,000 will be expended in FY 50, in Japan and continuing amts thereafter for life of proj.

3. Discussion here with representatives of Natl Research Council and AEC indicate that \$344,500 earmarked for expenditure in Japan represent fair and reasonable value for svcs and facilities to be secured. This is larger sum than previously considered and represents changes in plans which have just been recd by Natl Research Council. This contract would represent yen-dollar ratio of approx 200 to 1 which is believed to be much more realistic for transaction of this kind than is present mil conversion rate of 50 to 1. The 200 to 1 ratio is also well within gen limits of yen dollar ratios existing on other Jap exports.

FROM : CSCAD ECON NH : W 83269 7 JUN 48 CONT'D

4. It is understood that details of ams and facilities to be provided are avail in Atom Bomb Casualty Commission, Lt Col Tessmer or Mr Roger K Brewer, in such form as to permit consummation of contract with Natl Research Council. Contract would, it is understood, cover fol:

- Employment of Japanese \$24,000,
- Interim construction: \$105,000,
- Permanent construction:
- Contract for construction by Japanese contractor \$170,500,
- Aggregate, woodwork, reinforcing steel and other sups \$38,940,
- Total \$344,500,

5. Army opp on Research Council proposal is that it should be entered into as contract for export of ams and facilities for dollars and not as yen dollar conversion opr. Any discrepancy between actual yen cost and estimated yen cost on contract with Research Council might even be considered as Japanese contribution to research as they also will benefit immeasurably by it and application of results of research to their people.

6. Unless you have cogent reasons to contrary, consider Research Council contract as yen export. In entering into such contractual relationship, we are informed that representatives of Atom Bomb Casualty Commission officed in Public and Welfare Sec, HQ, SCAP, is auth and qualified to complete negotiations without representative of Natl Research Council being sent out from Wash. Mr Roger K Brewer and Lt Col Carl F Tessmer are research council's representatives. Would repeat and emphasize that funds involved must be contractually obligated by 30 June 48.

REVISED: (7 Jun 48).

Re May ADUT 9550. Atomic Bomb Casualty Research Program is subj. This msg in 4 parts.

Part I. Re above cited telecon, further discussion with representatives Natl Research Council (NRC) and Atomic Energy Commission (AEC) here have resulted in clarification of nbr of points not previously clearly understood by those reps or by CAD. Nbr of points, however, still require clarification before final determination can be made as to proper procedure to be followed in continuation of this research program. These points are:

A. Re PBC Item 1 A, Item 2, and PBC Item 7, what is meant by "essentially fair dollar value" of construction contemplated on procurement demand and how are these dollar estimates arrived at? Our understanding of your statement is that fair dollar value represents value of completed construction and does not involve yen-dollar conversion of any of various components or bear any relationship to yen cost.

B. Would you consider actual cost of similar construction in US to be reasonable index of fair dollar value in Japan?

C. Assuming that fair dollar value estimates are arrived at as indicated above, in what manner do these estimates differ from contractual value which would be placed upon comparable svcs and facilities by Foreign Trade Div of ESS.

Part II. Our understanding is that NRC desires to initiate both an interim and permanent construction program. Permanent construction program would involve buildings of higher type than interim program and would require that most of materials be imported from US. In considering permanent construction, how does fair dollar value take into acct or make allowance

for importation of these materials from US? Our understanding from your statements is that fair dollar value of permanent buildings is based upon square footage, or cubic content, and would have offset against its landed cost value of imported materials. Difference would represent dollar amt to be made to mil govt aucts. Is this correct?

Part III. Provision of billets. NRC has requested clarification on furnishing of billets in Kure. Will SCAP underwrite rehabilitation of Black House in Kure and make it avail to ABCO as billets on rental reimbursement basis similar to other billeting arrangements?

Part IV. Our info is that Dr Owen and Mr Pfeiffer were unaware of significance of your statement concerning availability of construction svcs on "fair dollar" basis through procurement demand. Their desire to negotiate direct with Boeki Cho through Foreign Trade Div was based upon belief that it was desirable to establish direct contacts and channels of communication with Japanese which would not be interrupted by termination of occupation and would have psychological advantage of obtaining continuing and direct cooperation from Japanese.

Suggest that further telecon be had on this matter soonest. We will have representatives of AEC and NRC as conferees and recommend that you have conferee from ESS Foreign Trade Div.

Part 1. Fol are conclusions and recommendations of SANACC
236/57 currently under review. In INMAC which paper seeks to
formulate US pos with regard to disposition of Jap external
assets other than in neutral countries. Text of SANACC 236/57
sent CINCPAC for comment by air mail on 14 May, ltr ADAO-S 306
Japan (12 May 49) CSCAD.

Conclusions.

"A. For the purpose of this paper:

"A. The term 'external' refers to location outside of
the area over which the Japanese Govt has jurisdiction under the
occupation.

"B. The term 'asset (S)' refers to any property, and/or
any right, title or interest therein, whatsoever.

"C. The term 'Japanese natl' refers to:

(1) Any individual who has been a subj of Japan at
any time on or since 7 Dec 41, but not including non-Japanese
natives of any area over which the Japanese Govt does not have
jurisdiction under the occupation.

(2) Any partnership, assn, corporation, or other
orgn under the laws of Japan, or which at any time on or since
7 Dec 41 had or has had its principal place of business in Japan;
provided that the assets of such a partnership, assn, corporation
or other orgn, shall be treated as Japanese only to the extent
of the Japanese interest therein.

"D. The term 'Japanese Govt' includes any sub-div,
agency, corporation, or instrumentality thereof, including the

5. The external assets direct or indirect, of the Japanese and of the Japanese Govt should be retained by the country in which the assets were located on 2 Sep 45, except that:

"A. Those located in Afghanistan, Eire, Portugal, Spain, Sweden and Switzerland (for present purposes, Switzerland shall be deemed to include Liechtenstein) should be disposed of in accordance with the provision of SWNSO 236/48 as amended.

"B. Those located in Siam should to the extent necessary be used by the Siamese Govt to satisfy claims of allied nations for damage arising in Siam out of the war.

"C. Those located in each of the 4 zones of Germany should be disposed of by the respective zone command.

"D. Assets of Japanese nationals who are natural persons should not be retained if such persons are permitted to reside externally or if they were deprived of life or substantially deprived of liberty pursuant to any Japanese law, decree, or regulation discriminating against political, racial, or religious groups, and except further that, notwithstanding anything in A, B, C, above:

"E. All real property, furnishings and fixtures, owned by the Japanese Govt and used for diplomatic and consular purposes, and all personal effects owned by Japanese diplomatic and consular posts, or the proceeds of any of the foregoing if already liquidated, should be preserved for return to the owners, net of any expense incident to such preservation.

"F. The foregoing do not apply to property rights, titles, and interests arising since the resumption of trade and financial relations between Japan and other countries since 7 Sep 45.

"G. Property belonging to religious bodies or not charitable institutions and used exclusively for religious or charitable purposes should not be retained.

"H. Literary and artistic property rights should not be retained.

"I. Japanese submarine cables connecting a point in Japan with a point in the territory of another nation should be deemed to be the external assets of Japanese and of the Japanese Govt (as the case may be) so far as concerns the terminal facilities and the lengths of cable lying within the territorial

Waters of other nations.

6. It is not intended to resolve herein any inter-
custodial questions arising among the countries by which the
assets are retained in accordance with Para 5 B. If a country
(or, derivatively, a natl thereof) retains, in accordance with
Para 5, paper evidence (or similar evidence) of right, title,
or interest in assets located in Japan, it should not lay claim
directly or indirectly to such assets in Japan that are so
evidenced; nor should such country require, by reason of such
retained evidence, any obligations of the Japanese Govt or
of Japanese natls in Japan from assets outside the territory
of particular retaining country.

7. Japanese natls whose assets are retained under Para 5
should be compensated by the Japanese Govt in a manner and
amount to be determined except as specified in SWNOC 226/22,
Recommendations.

8. It is recommended that:

A. The SWNOC approve these conclusions;

B. Inca and by SWNOC this paper be transmitted to
Army, Navy, AF, SCAP and State for info;

C. The Dept State fwd this paper to the US member of
the FEC for guidance and for appropriate use."

9. I am inclined to treat disposition of external
assets other than in neutrals as part of reparations settle-
ment as outlined in W 90732 (Johnston Report) and as you
recommended in C 52510, May, and therefore suggests that Para 5
above quoted text should be amended accordingly.

10. Your attn invited to Paras 4 C (2) and 5 B
above in their application to problem of branch offices in
Japan, cited C 57441, Dec and Ltr AG 390.6, 15 Nov 47. CRC/PP,
same subj.

11. Re earlier consideration this matter, see W 91573
and CX 57450, Inc.

Herewith SemiWeekly Report Nbr 58 on State Dept (OII) treatment of major current issues:

1. ERP appropriations:

AVOID sensational reports possibly reaching field through wire associations and other sources of severe cuts in ERP Appropriations. Stress actual sum recommended by committee for all the foreign aid programs rather than the cuts proposed, which in the case of ERP alone amount to only \$245,000,000. Bring out that the cuts are not final, and that the appropriation bill still has to go to the full House and the Senate before final passage.

2. United States support of collective security:

Give good play to House of Representative Foreign Affairs Committee approval of United States participation in mutual defense agreements within frame work of UN. Point to previous Senate committee action on same proposal.

Special State Dept (OII) guidance on results of London Conference on Germany:

A. The informal discussions on Germany between representatives of the US, United Kingdom, France and the BENELUX countries have resulted in a set of recommendations to the respective governments which are of momentous importance.

Bear in mind that these recommendations have not yet been approved by governments and particularly that there is a real possibility of disapproval by French Government as a result

of scheduled French Assembly debate. With this in mind, avoid excessively optimistic assertions implying that final agreement and implementation are already assured.

We can, however, offer comment designed to:

(Firstly) Underline the importance of these recommendations for Germany and Western Europe;

(Secondly) To correct misrepresentations of their scope and motives to emanate particularly from Soviet media.

B. Points to be brought out:

(Firstly) London recommendations represent a wide range of Inter Allied Agreement on the hitherto unsolved problems of the German settlement. In evaluating significance of the agreement we must appreciate that, in order to reach it, representatives to London discussion had to find common ground between often widely differing points of view of their respective governments and had to make concessions frequently involving matters of particular concern to their nations. Hence, the very fact that conference was able to accomplish its purpose within a relatively short time, constitutes an outstanding achievement in international cooperation between the Western Powers. Results of London Conference contrast sharply with complete futility of the more conspicuous International Conferences on Germany at which Soviet Union was present. They demonstrate that Inter Allied Agreement on German Problem is possible, provided that all parties concerned sincerely desire it;

(Secondly) To German People, and people of Western Europe, continued lack of Inter Allied Agreement on Germany so far has spelled serious political uncertainty and economic stalemate. Results of London discussions should therefore mark a decisive milestone on way to economic recovery, general stabilization and a fresh beginning;

(Thirdly) Scope of agreement reached at London is limited to fact that Soviet Union did not participate in discussions. However, it should be borne in mind that Soviet Union had in effect excluded itself by its attitude at preceding conferences, from participating, at least for time being, in

joint effort to find a solution for German problem. London Conference was held, because other Allied Powers preferred to achieve a limited solution, rather than accept complete stagnation for an indefinite period of time. It will depend on Soviet Union to broaden scope of agreement so as to apply to all of Germany and to avail itself of existing quadripartite machinery to effect such extension. Meanwhile, inclusion of BENELUX countries has served to demonstrate that door is open for all parties sincerely interested in European recovery and to make conference more fully representative of viewpoint of European Nations;

(Fourthly) Within these limitations, results of London discussions represent an unprecedented opportunity for Germany to participate in rehabilitation of Europe on a more equal basis and to gain a substantial measure of freedom of political action, and of governmental responsibility. Acceptance of recommendations would open way for first time since end of war, to establishment of a German Govt, to be limited in its powers merely by requirements of Allied Occupation and international security. Concrete procedures are offered which will make it possible for German people to initiate preparatory work without further delay. Government will be established by German people themselves in free and democratic elections. It will protect rights and freedoms of individual. Its federal structure will safeguard against development of a dangerously centralized government susceptible to totalitarian encroachments. But federal government will possess adequate authority in order to deal effectively with matters of Internal Administration and to assure effective participation of Germany in European Recovery Program. As to latter there will be a more precise definition of Rights of German people, represented by their new government, in relation to occupation powers. Federal structure should also facilitate

ultimate adherence of those German states which are not yet included in New Union. Finally, agreements will pave way for a closer and freer association between Germany and Western European Nations. (Caution: Comment should avoid speculating on nature of German government beyond points set forth in above paragraph)

~~SECRET~~ Germans must be made to see that granting of these privileges in interest of common European rehabilitation effort involves a profound change of attitude especially among nations which were subjected to German occupation during war. It must be realized in Germany that this is a difficult process, which may be accompanied by strong protests and possibly by venting of deep seated emotions. Democratic character of governments, which were represented at London, requires that substance of recommendations may become subject of extensive public debates, which will determine whether they can win full support of nations concerned.

Equally, it is unavoidable that privileges contained in London recommendations are coupled with provisions designed to safeguard against resurgence of German aggression at any time and under any form, and against any one sided use of German economic power, e.g., that which is represented by possession of Ruhr. These provisions are fully compatible with requirements of German rehabilitation. It will be an opportunity for New Germany to show its peaceful and cooperative intentions toward other European nations, by accepting these safeguards with understanding. Continuation of Allied Occupation in Germany, however, should be considered as a matter of military and political security. It is intended not merely to protect Europe against a resurgence of German militarism but as a strong insurance to the German democratic forces that Nazi elements will not be permitted to reassert themselves.

Note: Regret inability to provide advance communique text. Definite final version not yet available Washington. All points should guard against possible counterfeit communique "texts" which may be circulated prior to release of official text.

Subj is ferrous scrap. Reurad C 60459, May 48. This radio in 2 parts.

Part 1. Does 3,500,000 tons total scrap available in Japan mentioned par 5 urad include steel mill "home" scrap in addition to available, "purchased" scrap?

Do scrap requirements mentioned in Par 5 include requirements for "home" scrap?

Above info desired soonest to reply to inquiry from Secretary of Commerce.

Part 2. Interest in scrap currently at unprecedented high due to increasingly critical shortage for US furnaces. Secretary of Army and Secretary of Commerce have personally conferred on means to increase scrap exports from occupied areas to US. High level Governmental officials and Congressmen are urging increased scrap shipments from Army resources.

Attn is presently focused on Germany, but expect it to shift to Japan in near future. Every effort should be made to increase availability of Japanese indigenous scrap in accordance with Secretary of Army's desire that scrap not be hoarded for long time future needs of occupied areas.

Your CX 60944 is step in proper direction.

Herewith biweekly report Nr 57 on State Dept (OII)
treatment of major current issues:

1. Improvements in Western Europe:

It may be valuable to survey recent indications of
gradual improvement of conditions in Europe, at least indirectly
under influence of ERP, such as, overwhelming vote of confidence
for Premier Schuman in Chamber of Deputies; Premier De Gasperi's
speech to Italian Parliament that Italy now no longer need fear
great economic depressions, partially because of ERP; achievement
of virtual free trade between bizonal area of Germany and ERP
countries as announced by Gen Clay; and British pound sterling
credit to France.

2. Wundt Anti-Communist Bill:

A. While march on Washington in connection with Wundt-
Nixon Bill cannot be ignored entirely, it should receive only
minimum of brief factual coverage, pointing out that this
represents form of seeking to influence legislature, often
resorted to in the exercise of traditional American liberties.

B. Comment on substance of bill and debate surrounding
it, should preferably be avoided. As far as necessary, emphasize

the need felt in the US to guard against possible subversive activities. Show that legitimate debate represents the natural process of the public safeguarding itself against unnecessary encroachments on individual freedom, but that some of clamor against bill is organized for propaganda purposes.

3. Soviet Wages:

Give good play to Schwarz study on Soviet "Real Wages" which is considered reliable here and which should be good material for trade union audiences in all areas. (Carried in CAD-OANS Newsfile on 3d).

4. Trieste Note:

European media should give good play to latest US note on revision of Italian Peace Treaty. Contrast US evidence of willingness to cooperate to Soviet failure to respond adequately in past, which has made solution of Trieste problem increasingly difficult.

5. Refugees:

- A. Note continuing resignation and exodus from Czechoslovakia of former Czech government officials.
- B. ISB output to eastern Europe should point to US Senate reaffirmation that half of all DPs admitted into US under proposed new legislation shall be refugees from lands annexed by Soviet Union.

6. Czechoslovak Elections:

Give good play to fact that approx 35 per cent of Czech electorate did not vote or cast blanks or non-valid ballots in Czechoslovak elections.

7. Korean Assembly:

In connection with Rhee's criticism of Gen Hodge's action in making suggestions to Korean Assembly, every effort should be made to avoid giving any impression of a conflict between US authorities and newly elected Korean Govt. If comment is required, emphasize that Hodge letter specifically points out that no dictation is intended, refer back to Hodge's May 30 speech stating that US Command in Korea does not intend to dictate in establishment of Korean Govt.

DECLASSIFIED PER JCS LTR OF
20 AUG. 75

Fundamental positions of Jews and Arabs apparently unchanged with respect basic Palestine issues. Neither side willing to compromise. Response by both to UN cease fire proposal evidently determined by strategic considerations and not by willingness to return Palestine problem to UN for solution.

Since recognition by US and USSR, Jews regard sovereignty of Palestine as established fact no longer subject to debate. Qualified acceptance of cease fire proposal makes continuance of fighting practically inevitable for present.

Difficult to determine whether Jews or Arabs militarily superior because main forces have not been joined in battle. There is uncertainty as to Arab readiness to risk possible decisive battles for Jewish ports at this time.

Jewish strategy and opposition to arms embargo suggest continued build up reserves men and munitions essential to Jews.

In view past Soviet policy, consistent aggressive support by USSR of Jewish aspirations for Palestine can only signify Soviet hopes to dominate new govt for purpose establishing Communist stronghold in Eastern Mediterranean.

Strong possibility Czechoslovakia will ship arms to Palestine regardless UN or other embargo action.

Agreement reached London conferees of US, UK, France and BENELUX countries on future Western Germany subj to confirmation by govts concerned before final adoption. Soviets continue maneuvers to dissociate administration of Western Zones and Berlin.

Elections in Czechoslovakia revealed strong undercurrent of opposition to Communist regime but also conclusively demonstrated

stranglehold Moscow has on country. Cabinet crisis in Finland precipitated by non-Communist efforts to loosen Communist hold on police before 1 Jul elections is reminiscent of former Czech efforts to block Communist control. Finnish crisis ended with apparent compromise but Communists obviously have whiphand.

Announcement by Burmese Premier Vhakin Nu of intention to resign to work for Communism raises serious possibility future Communist govt in Burma. Establishment by French or Viet Nam Govt under Gen Zuan regarded as stopgap measure of limited significance.

NR : WAR E3069

DECLASSIFIED PER DA CIRC. #127
23 DEC. 53

Reurad Apr C 60043. 1. The Reynolds Metals Co has submitted to the Under Secy of Army a proposal for entering into a management contract in the opr of a portion of Aluminum Industry as fol:

"Re Japanese Aluminum Industry.

Dear Gen Draper:

"The office of the Supreme Commander for the Allied Powers has suggested that we make a new offer in connection with the proposed opr of the Japanese Aluminum Industry. On 18 Feb 48, we offered to supply 8.36 tons of Bauxite FOB Bintan plus \$143.60 and receive in exchange 1 ton of aluminum metal. This amt of Bauxite was to be sufficient to make 2 tons of metal, 1 to be kept in Japan and the other to be delivered to ~~US. use.~~

"We have now been advised that SCAP has purchased Dutch Bauxite sufficient to produce the first 25,000 metric tons of aluminum. Under these circumstances it has been suggested that a management contract embracing some of the features of our previous offer would enable the plants to function quickly and efficiently in accordance with SCAP's policy.

"Reynolds Metals Company would be willing to enter into a management contract with the Nippon Light Metals Company, with the approval of the Japanese govt and SCAP, on the fol terms:

"1. Reynolds would assume the technical and adm direction of the Aluminum Plant at Shimizu and the aluminum reduction plants at Kambara and Kiigata and would collaborate with the present officials of the Nippon Light Metals Company

in operating these plants.

"2. Reynolds would be paid no management fee but would be reimbursed for its dirosy expenses and overhead.

"3. Reynolds would supply 1,000 tons of Cryolite, 3,000 tons of Petroleum Pitch Coke and 12 rammers to permit opre to commence without delay. The cost of these items would be applied as a credit on Reynolds purchases of aluminum pig, thereby making it unnecessary to obtain dollar exchange to this extent.

"4. As consideration for our management, tech supervision and such raw materials Reynolds would have the right to purchase 50% of the aluminum pig produced by these plants at the current market price in the US less US duty and freight to Chicago Ill. In add subj to later apl SCAP and the Army Dept when investment policy is determined, we would have an option to purchase 50% of the stock of the Nippon Light Metals Company on the terms of the attached option letter executed by that company on 16 Feb 48, with appropriate extensions of time.

"5. Reynolds would negotiate with Japanese fabricators to convert at least half of such aluminum pig into sheet, cable and other aluminum products which can be manufactured economically in Japan for American or foreign markets. If desired by SCAP we would be willing to negotiate with Japanese manufacturers to fabricate up to 100% of the aluminum pig in Japan.

"6. Nippon Light Metals Company would be auth tp produce at least 75% of the first 25,000 metric tons of aluminum allotted for production in Japan by SCAP. As production limits are increased Nippon Light Metals Company would be permitted to increase its production up to capacity. Bauxite and any other raw material purchased by SCAP for opr of the Japanese aluminum industry would be made avail to the plants at cost.

20 AUG 75

Reurad C 60893 dtd 24 May 48.

Instructions contained herein pertain to appropriated funds and supersede all previous instructions or opinions received by you in conflict herewith.

Pers and functional operations of the theatre US P and C Off and the SCAP Commercial Account (Boeki Cho) will be immediately physically and administratively separated.

The theatre P and C Off will make purchases from Boeki Cho only in cases where prior approval for such purchases is obtained from DA and the commodities are those included in the overall GARIOA Program. The price paid from appropriated funds in all cases must not exceed the cost at which the item or acceptable substitute can be laid down in Japan through procurement by normal Army channels.

This procedure contemplates early adoption of planned procurement programs which will permit Boeki Cho to accept required GARIOA commodities in barter for exports or in exchange for soft currencies under prior agreement with theatre P and C Off (subj to above conditions) for their purchase by the Army from appropriated funds. This procedure does not contemplate or condone that the theatre P and C Off will delegate his normal procurement functions or operations to Boeki Cho or that he will make other than required and justifiable purchases from Boeki Cho.

While Army procurement of GARIOA commodities may be progressed with the view of rendering justified aid to Japanese economy, the theatre P and C Off will make direct purchases from other vendors.

where advantage to US accrues. Direct purchases under established Army procurement procedures obviates the use of letters of credit and cargo insurance. Proposed purchases, using appropriate funds, from vendors outside the overall theatre boundaries will be accomplished by DA unless otherwise directed in specific cases. Exception is present in those approved cases where Boeki (Bo) acquire required commodities in barter or for soft currencies or in other exigent circumstances. Each exception must stand on merit of price, item requirement, and other factors.

Proposed theatre Army purchases outside theatre limits which are now pending and have not been approved will be submitted to DA for decision as to whether such purchases will be made by DA or theatre.

WD Cir 53 is superseded by DA Cir 142, 17 May 48.

Reur C 60804, Cable 407 from Amembassy Bangkok repeated to SCAP and Cable 1120 from Consul General Shanghai repeated to SCAP. If Siam declares additional rice available claim will be presented to IEFC on behalf of Japan and Korea: Should be emphasized however that no purchase can be financed until FY 49 funds are available. Agriculture buying all sugar for occupied areas and is considering Formosa offer.

Recommend that SCAP explore possibility of trade agreement with exporting countries to exchange Japanese exports for rice and sugar. Such arrangement, if possible, would aid Japanese export program and strengthen case for defense of rice allocation. GARIOA Funds can be used to reimburse Japanese export account as outlined in cable to be dispatched shortly which supersedes our WAR 82450 dtd 24 May.
