Pass to SAOOA OAPL. Subject is medical supplies and equipment property of members of the Unitarian Service Committee, Medical Mission to Japan. Subject equipment was shipped to Japan, thirteen pieces, as Army cargo re your message WCL 30756, 1 July 1950.

Mission desires that individual equipment be returned via most expeditious transportation direct to their various colleges. Department of the Army invitational travel orders do not contain such provision. Will not experience difficulty from Japan to aerial port of debarkation in Zone of Interior but difficulty will be encountered for transportation from aerial port to colleges.

Request that Department of the Army invitational travel orders be amended to authorize shipment as indicated in paragraph two above. Reply requested as soon as possible as departure dates are being firmed.

30 August 1950

MEMORANDUM FOR RECORD:

1. D/A travel orders in possession of mission members do not provide for return of their medical equipment to the ZI. This is in addition to their authorized weight allowance of 115 pounds while travelling via air.

2. Mr. G. E. DeVille, Public Health and Welfare, requested that the equipment, which was brought to Japan under competent orders, be returned to the ZI.

3. Mr. DeVille stated that the Office of Comptroller called attention to deficiencies in the orders, and subject message is being sent to have orders amended to include this authority.

4. Coordination: Mr. G. E. DeVille (PH&W)

5. Action initiated and suspended on Trans Jo No \_\_\_\_\_ pending reply. Suspense date: 5 September.

MEMO FOR RECORD:

1. Reference is radio W 94940 from Dept of Army (SAOOA CAEC), dated 25 Oct 50, subj: Bilateral United States-Japanese Trade Agreement, which indicates that the Trade Agreements Committee decided at a meeting held 20 Oct to postpone for an indefinite period, consideration of bilateral United States-Japanese trade agreement in view of possibility that negotiations might have adverse effect on re-enactment of trade agreement Oct 51.

2. SCAP has been requested to furnish the following information inasmuch as discussion of the problem by TAC may be resumed at any time:

a. Statement re desirability of immediate negotiation of bilateral agreement.

b. Info re status Japanese Tariff Act with particular reference to negotiability and date it becomes effective.

c. List of major exports, whether or not affected by impending tariff schedule changes, upon which Japan would wish to negotiate for concessions at the appropriate time.

3. A study is being made currently, and it is estimated the information requested will be submitted in about a week.

4. No concurrences necessary.

For COT. Rqst consideration lifting restriction imposed by DEPTAR upon acceptance by west coast ports of privately owned veh for shpmt to FEC. Provided fav consid rqst prior notice to CINCFC to enable owners in FEC to notify agents in ZI that ports will again accept veh as of date approx 21 days subsequent to announcement. Such a plan would obviate pers currently arriving at ports for FEC destn turning veh in ahead of cars of pers in FEC previously not accepted by ports. Serious morale problem has grown from anxiety of owners who were unable to arrange for qualified agents vic port.

TO: DA WASH DC . . . . . PRIORITY

**Z-22920**

For OLL. Reur TGL 21364 of 24 Oct and TT 3935 of 25 Oct.  
Subject is information for Senate Subcommittee. This message in eight parts.

1. Reur 1-A. Description of postwar Japanese export procedure follows:  
From the opening of limited private trade in 1947 until 1 December 1949 all Japanese exports were covered by contracts which were validated by SCAP. During this period commodity, price and destination were reviewed and approved by SCAP Headquarters. Upon the passage of the Foreign Exchange and Foreign Trade Control Law by the Japanese Diet, the control of exports and imports was put under Japanese law with SCAP exercising surveillance over the actions of the Japanese Government and it in turn over private exporters. Cabinet Order 378 was issued 1 December 49 under the authority of the aforementioned law. This Cabinet Order provides that all Japanese exports, on which satisfactory means of payment have been made by the buyer, may be moved without license except for a list of commodities set forth as Appendix 1 in that Cabinet Order on which export licenses are required. The Order also delegates authority to the Customs Chief to act for the Ministry of International Trade and Industry in the issuance of re-export licenses on non-strategic and non-critical commodities where those commodities have been imported and held in customs bonded warehouse. Appendix 1 to the Cabinet Order includes in exact comprehensive terms the commodities which appear on the U. S. Positive List as well as all food and goods imported into Japan and items specifically described as contraband. This list has been revised four times to conform with changes in the U. S. Positive List. Most recent revision was 9 October and includes 40 categories of goods.

2. Reur 1-B. SCAP has directed the Japanese Government to refer to this Headquarters for validation, all applications for export licenses covering designated numbered categories of commodities which appear in Appendix 1. This instruction of the Headquarters covers items on the U. S. Positive List plus some other commodities in which SCAP is interested for protection of U. S. appropriated funds. Procedurally, SCAP reviews all export license applications submitted for validation and approves and validates all licenses covering commodities of a non-strategic and non-critical nature using as a standard for definition of the terms "strategic" and "critical," the confidential lists which are supplied by the U. S. Government to SCAP. All applications for license with indicated destinations within the Communist orbit and covering strategic and critical goods as defined by U. S. confidential lists are submitted to a high committee of the Headquarters for consideration. Prior to 25 June 1950 certain goods known to be needed in North China for rehabilitation of mines which have been supplying

FROM SCAP TO DA ESS WFM ms

Japan with coking coal and iron ore and with other durable goods in limited quantities, have been approved and validated when the payment for these commodities has been made with Chinese exports of food and raw materials essential to the Japanese economy. Since 25 June 50, there have been approximately 300 applications covering commodities valued at over 10 million dollars for export to Communist China covering goods considered by this Headquarters committee to be strategic and critical on which no report or favorable action has been taken. There have been limited deliveries made on some approved non-military commodities which were put into manufacture after the receipt of an export license validated prior to 25 June. During this recent period similar goods have been exported freely by Hongkong, Singapore, and the UK and other exporting nations.

3. Hour 1-C. Procedures and SCAP surveillance are carried out as follows:

a. Japanese laws require all strategic (Positive List) commodities landed in any manner anywhere in Japan to be covered by an export license approved by the Japanese Government Ministry of International Trade and Industry and validated by SCAP before exporting or re-exporting may occur as described heretofore.

b. Under Japanese law exporters are required to show port and country of unloading on export declarations.

c. Japanese law requires applications for licenses to export to show destination and country of final consumption. Where SCAP questions destination shown or suspects in-transit shipment, SCAP requires production of letters or other evidence of ultimate use and user and buyer's statement that goods will not be re-exported and checks this information with officials abroad where possible.

d. Where vessels enter Japanese ports carrying "in-transit" positive list goods which are not repeat not unloaded, under international law Japanese export controls may not repeat not be applied.

e. Enforcement of Japanese Government export laws and SCAP export regulations is accomplished in the following manner:

(1) Operational supervision of cargoes is responsibility of the Japanese Customs Service with surveillance by the Customs, Immigration and Quarantine Section, Japan Logistical Command, at Yokohama with CIQ detachments in thirteen major port cities. Public Finance Division, Economic and Scientific Section, GHQ, SCAP, effects policy guidance over Japanese Customs Service.

(2) Control of export licenses by Ministry of International Trade and Industry over which Foreign Trade and Commerce Division, ESS, exercises supervision.

(3) Smuggling detection by Japanese Government Maritime Safety Bureau of Ministry of Transportation operating through the Maritime Safety Agency which controls harbor-masters and operational units under SCAP supervision.

## 4. General Reference material.

a. From 1 January through 30 September 1950 Japanese import licenses were authorized for import directly from China on an escrow letter of credit basis for \$10,926,697. The major commodities and values authorized were:

Rice	\$ 2,872,800
Soye beans	2,600,000
Coking coal	1,839,705
Salt	1,237,974
Peanuts	870,000
Iron Ore	513,500

When imports are brought in on an escrow basis, credits are established for Chinese seller and counterpart shipments sufficient to offset these imports must be made to balance value or US free dollars paid.

b. Exports (shipments) from Japan to China during the period 1 January to 31 August 1950 totalled \$7,025,575. The major commodities and values are as follows:

Galvanized sheet	\$ 2,777,544
Mild Steel reinforcing bars	1,039,634
Mild Steel Plates and sheet (not galvanized)	700,433
Mild Steel wire	208,671
Mild Steel Pipe	187,464
Mining and Industrial Machinery not for military use	905,079

All exports were made in accordance with Japanese regulations and no commodities of potential military value were exported.

c. From 1 January through 31 August 1950 imports (arrivals) into Japan from all sources, including China, totalled \$26,948,847. These imports included commodities imported from China through the Hongkong Open Account as well as approximately \$7,800,000 of soye beans which were obtained from China by the U. S. Commodity Credit Corporation in exchange for U. S. cotton and sold to the Department of Army for delivery to Japan. The major commodities and values are as follows:

Soye beans	\$ 11,839,703
Peanuts	3,355,703
Heavy Coking coal	2,923,822
Iron Ore	2,159,235
Ramie	2,113,476
Oil Bean cake	633,121
Tung Oil	510,493
Hides and Skins	503,040
Total -	\$ 24,038,593

The balance of the imports consisted of other small lots of miscellaneous raw materials essential to the operation of the Japanese economy and without which

UNCLASSIFIED

FROM SCAP TO DA ESS WFM ms

the economic recovery of Japan would have been retarded.

d. Where settlement for commodities of Chinese origin is effected through the Hongkong Open Account, counterpart shipments are made to Hongkong and there is a strong possibility that Hongkong re-ships the major part of such goods to China. Therefore, all Japanese exports to Hongkong are carefully screened to apply the controls outlined in Parts 1, 2 and 3 above.

5. Reur 1-D and E. Answered by mymsg Z-21848 Oct 50 with actual documents involved transmitted as portion of Parts 1 and 3 mymsg C-67184 Oct 50.

6. Reur 1-F. Answered in Parts 1, 2 and 3 above.

7. Reur 2. Entire manifest of steamship F. J. LUCKENBACK loaded Yokohama 12 Sept which included 45 bills of lading has been checked. Plate cuttings, scrap tires and nitrate film did not receive required license, therefore, not repeat not shipped and all are at present in Yokohama warehouses. Actual cargo shipped complied with licensing requirements and involved no repeat no violations of export regulations.

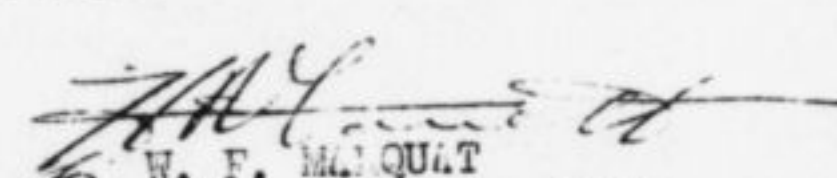

Entire manifest of steamship MARY LUCKENBACK loaded Yokohama 12 July which included 23 bills of lading has been checked. Seven bills of lading covered shipments to United States; two bills of lading Mexico; one bill of lading Costa Rica; one bill of lading Montevideo, balance (12) for China. Cargo complied with licensing requirements and involved no repeat no violations of export regulations.

8. Reur 3. Peter A. McDermott now on TDY Washington will represent this Headquarters for necessary testimony. Mr. McDermott should refer to two other radios from here on subject to complete information available to him.

2. Informal advice received here indicates that difficulty is being encountered in recruiting individuals for the Industrial Management Program (see reference letters). This project is considered particularly desirable at this time, especially in view of interest being evidenced by top-level Japanese personnel. However, it remains urgent that the individuals recruited for this project be highly qualified so as to command respect from leading Japanese industrialists.

3. Several sources have recommended that high level approach be made (possibly by Secretary or Under Secretary of Army) to Mr. Ewing W. Reilly, who is currently serving as consultant to Secretary of the Army. Information here indicates that a suitable approach to Mr. Reilly might result in his accepting responsibility for heading and organizing the Industrial Management Mission. Starting date might be delayed as much as four months if this would make it possible for Mr. Reilly to accept.

4. Request comment on feasibility of obtaining Mr. Reilly's services.

JWC'B/BCD/tpo  
27 October 1950

MEMO FOR RECORD:

1. Reference letter from GHQ, SCAP, to Under Secretary of the Army, AG 230.14(1 Aug 50)Ga, 1 August 1950, subject: Visiting Experts under G.R.I.C.A. Project 412, requested visiting experts be recruited for fiscal year 1951 from funds allocated under G.R.I.C.A. Project 412.

2. Reference letter from GHQ, SCAP, to Under Secretary of the Army, AG 230.4(7 Aug 50)Ga, 12 August 1950, subject, as above, recommended that recruiting officials in the Dept of Army who were recruiting for the Industrial Management Mission contact Mr. Alvin C. Barber, Chief, SCAP New York Foreign Trade Office for advice and assistance in the recruiting of the members of this mission.

2. Subsequent information received from Mr. Barber indicates that his office has been contacted with respect to this matter and has been making a considerable effort to find suitable personnel for the group. Mr. Barber's most recent letter to ESS indicates that ordinary recruiting methods are proving unsuccessful. This letter calls attention to the fact that several sources have recommended that Mr. Ewing W. Reilly, a highly experienced management consultant now assisting the Secretary of the Army, be contacted by a high-level Department of the Army official and asked to head the Industrial Management Mission and undertake the recruitment of three other individuals for this mission.

3. Instant radio calls attention to this possibility and requests Department of the Army comment on feasibility of obtaining Mr. Reilly's services.

4. This is an administrative matter.

5. Concurrences: None required.

For SACPD OAB 1. CINCCE message Z 21282 and Department of the Army message WCL 21300. Conversion of employees from nonappropriated to appropriated funds involves only those employees engaged in Special Services recreational activities and Troop Information and Education activities. Employees of revenue-producing activities, Exchange and Motion Picture Service, not involved.

Employment of Special Services and Troop Information and Education personnel is essential to perform assigned missions. Duties and functions are the same regardless of source of funds for payment of salaries. Payment of all employees from appropriated funds is temporary for the time being. Considered here that conditions dictated by the current emergency and the large number of resignations impending as a result of conversion to appropriated funds warrant an attempt to secure waiver of provisions of Classification Act of 1949 to permit conversion at rates higher than entrance rate of grade. Substantial savings in appropriated funds otherwise required for recruiting replacements would accrue to the Government and since such waiver would be on a temporary basis, nonappropriated fund structure would not be jeopardized. Earnestly request assistance.

Memo for Record:

1. DA msg JCL 21001, 22 Oct 50, to CINCPAC, establishes DO (Defense Order) ratings for Repair and Utilities activities in the FEC. This rating applies to all orders which involve procurement in the ZI.

2. No such DO rating has been received for the Okinawa Construction Program. Information was received from one of the joint venturers who have the contract for construction of refrigerated storage warehouse in Machinato that the supplier thru whom they have ordered certain essential materials from the U.S. cannot supply the materials until a DO rating is established. This contract is critical since the funds under which it is being built must be expended prior to 30 June 51. It is, therefore, essential that a DO priority be established at the earliest possible date for this as well as other contracts dealing with Okinawa Construction Program.

3. Instant msg requests establishment of priority rating by CCB DA to whom such authority has been delegated.

Z - 22562

For SACOA OABO. Ur msg WCL 21137 of 231905Z  
October. Subject is COA conference. This msg in four parts.

Part 1. Ref Part 2 umsg. Concur in Japanese luncheon speaker. Nomination will be forwarded within one week. Suggested subject "The Humanities in Japan." Other Japanese from Proj 161 might assist in geographical area meetings on higher education.

Part 2. Re Part 3 umsg. Proposal to discuss public health and welfare, labor, and agricultural problems at this conference comes as surprise in view umsg WCL 47726 of 062337Z October. Considered inadvisable to include these on agenda unless SCAP representatives these fields present. No request for such representation received and no plans as yet made here for such representation. Request comment. Although discussion legal and government affairs also surprise, consider Dr. A. C. Oppler and Mr. Charles Kades now with Supreme Court National Leaders Project might represent SCAP in these discussions if included on agenda. For adult education suggest Dr. Moss now attached Reorientation Branch. Suggest participation in appropriate section meetings by members of Natl Ldr Proj 206 White House Conf. Names and background info will be forwarded SAP. Takeshi Haruki of Proj 161 eminently qualified to discuss UNESCO in Japan. Proposed evening session viewed with some concern. Program appears to be of such length as to bore audience as did extended program last December. In view of proposal to show films from all three areas in addition to address by prominent speaker, considered unnecessary to title and send more than one documentary from this hdqs. Do you concur?

Part 3. Ref Part 5 umsg. Request deadline for receipt of this material by furnished SAP. Pre-conference reproduction should take only two or three days.

Part 4. Ref Part 6 umsg. Voluntary agencies can best assist as follows:

a. Exchange and/or gifts of professional books, journals, reprints of articles. Anything produced within past ten years valuable. Especially

UNCLASSIFIED

FROM: SCNP TOKYO JAPAN TO: DEPTAR WASH DC HNN/hma 26 OCTOBER 1950

needed are back files of scholarly publications. Exchange of current material between professional societies, libraries, universities, research institutes, foundations, and individual scholars should be encouraged and financially supported.

b. Financial grants to underwrite production of significant monographs, scholarly journals, etc. within Japan. Much significant Japanese research unpublished due lack of funds. Scholarly journals facing tremendous difficulties; some are suspending.

c. Funds for translation and publication in English of significant Japanese research. Much ignorance in U.S. of valuable Japanese research, especially in social sciences, largely due language barrier. American scholars could benefit greatly from availability in English. Work could be done either U.S. or Japan provided funds made available.

d. Grants for specific research projects in designated fields. Due exchange rate, relatively small grants would finance important projects by Japanese scholars.

e. Mechanical aids to research such as tape sound recorders, typewriters, bibliographical materials, mechanical computing machines sorely needed by universities and research laboratories.

f. School equipment of all kinds, audio visual materials, charts, maps, athletic supplies, materials for schools for handicapped such as recordings, etc., needed.

g. In addition to publications noted para a. above, need gift books of all kinds with obvious exception of those trashy or ephemeral. On basis of most beneficial, kind needed in greatest quantity, and Japanese inability to obtain without assistance, priorities approximately as follows:

- (1) Children's books, especially picture books and books in simple English.
- (2) Teen-age books, also in simple English, on the U.S., outstanding Americans, school life, world problems, and sports.
- (3) Current and recent books in social sciences, emphasis on democratic political theory and institutions, general sociology, communication anthropology, labor-management relations, community welfare, women's position cooperatives, etc. These for university and other libraries.
- (4) Books of and about American literature, art, music, and stagecraft. Especially needed are books which can be used in university courses in American literature.

FROM: SCAP TOKYO JAPAN TO: DEPTAR WASH DC DION/hma 26 OCTOBER 1950

(5) Subscriptions for individuals and libraries (in addition to para a. above) for such magazines as Saturday Review of Literature, New York Times Book Review, Harpers, Atlantic Monthly, Foreign Affairs, Theater Arts, Virginia Quarterly Review, Fortune, etc., can help enrich thought in areas not easily covered by other media.

h. Organizational literature - many American organizations, institutions and companies publish brochures, pamphlets, charts, discussion guides and related literature normally not purchasable. If publishing agencies can be persuaded to mail them, in almost all cases there are parallel Japanese agencies which would be stimulated by them and interested in adapting them for distribution within own circles.

i. 16-mm prints of educational films on all subjects, even though titled or voiced in English, would receive wide use in Japanese schools and organizations.

j. Art: Expense involved probably makes impossible exchange original art works for museum display but American art galleries and libraries might consider exchange photographs or other reproductions of art with Jap counterparts.

k. Donation of printing paper for scholarly publications, plates for book illustrations, especially color plates in scientific books, raw film for making of motion pictures by Japanese non-commercial agencies, strings and reeds for musical instruments.

l. Exchange of persons: Private agencies might well consider supplementing GARIOA program by providing expense-paid observation trips and fellowships for artists, musicians, writers, actors, librarians and organizational leaders. Also important is development of real exchange professor and exchange student program. Additional programs such as Rockefeller-Stanford University-Tokyo University 1950 seminars considered invaluable.

MEMO FOR RECORD:

The BIG 9 Program for repair of construction equipment and other types of Engineer equipment could be increased at least 20% with the present facilities provided DAC now authorized could be obtained. Shortages in DAC now total 54. For the past several weeks the YED under which the Depot Maintenance program functions, has been unable to secure the needed personnel. Any help which OCE may apply toward securing personnel would help the BIG 9 program. Inasmuch as facilities are available for increasing the program on a one shift basis, provided the DAC shortages are filled, it is not advisable to attempt to start a second shift. However, in limited activities to balance production, a second shift is being, and will be used for short periods of time. Once the single shift is raised to a production equal to the capabilities of the physical plant now available, a second shift will be considered. This has been coordinated with YED.

250231

B

FROM: SCAP TOKYO JAPAN  
TO: DA WASH DC.....ROUTINE  
INFO: CNO WASH DC.....ROUTINE  
COMNAVFE TOKYO JAPAN.....ROUTINE (COURIET)

Z X 22 198

The following is furnished for information. In order to meet future economic requirements of Japan, the Japanese Government has proposed the following JFY 1950/51 new Steel Merchant Ship Construction Program and has requested that former tonnage and speed restrictions, arbitrarily imposed by SCAP during JFY 1949/50, in lieu of positive shipbuilding directives, be lifted.

It is proposed to remove tonnage and speed restrictions.

Under existing limitations new shipbuilding is difficult to finance except by counterpart loans because ships are not competitive with larger and faster vessels.

*Cur*

Revenue from shipping is highly important to Japanese economy and directly affects balance of payments and consequent United States support.

With restrictions removed more ships can be built and greater use will be insured in competitive shipping service.

It is further proposed to approve the following program:

Column A Type	Column B Gross Tonnage	Column C Aggregate Gross Tons
Miscellaneous Vessels	Over 100 - Less 2500	20,000
Domestic Vessels	Over 100 - Less 4000	30,000
Ocean-going Vessels	Over 4000	250,000
TOTAL. . . . .		300,000.

a. Included in the above proposed program for ocean-going vessels are:

UNCLASSIFIED

Page 1 of 3

inf- 95097 notes.

UNCLASSIFIED

FROM: SCAP TO DA INFO CNO, COMNAVFE

ESS/IND/WFM/HTM/MMC/HBO/ECW/vji

1. Thirteen 5000 - 10,000 gross tons diesel or turbine driven cargo vessels aggregating 87,250 gross tons, with speeds ranging from 14.5 to 18.8 knots.

2. Two 12,000 - 15,000 gross tons diesel propelled tankers aggregating 27,000 gross tons with speeds ranging from 14.5 to 16.0 knots, a total of 114,250 gross tons.

3. The remainder of the 250,000 gross tons ocean-going construction program (135,750 gross tons) is still under study by the Japanese Government and the shipping industry in Japan. It may not be possible for the Japanese to realize this entire program due to general financial limitations.

b. In addition to the above program, Japanese whaling interests have proposed to construct 35,000 gross tons of whaling factory vessels. Such vessels not to exceed 20,000 gross tons. In accordance with Japanese laws, whaling factory vessels are considered to be in the category of fishing vessels and therefore would not fall within the purview of the above Merchant Vessel Construction Program. Whaling factories are employed in whaling for about five months and during the remainder of the year, carry commercial oil cargoes and as such are considered tankers (merchant vessels) in the United States.

c. Legislation to encourage scrapping of superannuated low efficiency and wartime standard vessels passed by last Japanese Diet session authorizes a program for scrapping 400,000 gross tons to liquidate financial burdens and release idle crews.

d. As of 1 April 1950, the Japanese steel merchant fleet consisted of 1,682,705 gross tons. Retirement due to scrapping of superannuated vessels during the Japanese fiscal year 1950/51 totals 400,000 gross tons, as indicated in para c above. This deducted from the present existing steel merchant fleet plus addition of 300,000 gross tons proposed construction for the Japanese fiscal year 1950/51, will provide a total steel merchant fleet of approximately 1,582,705 gross tons by the end of the Japanese fiscal year 1950/51.

e. Newly constructed ocean-going vessels will be efficiently powered and built to Classification Rules, complying with International Safety of Life at Sea Regulations and International Load Line Regulations.

For SAOOA. Urmsg WCL 20589.

Oil owned by U.S. interests and exported by Isbrandtsen Steamship Company, agent for American Oil Company, New York, and licensed for shipment to China by U.S. Department of Commerce was offloaded in Kobe and Osaka as in-transit cargo pending owners arrangements for satisfactory payment by Chinese buyers. Subsequently Japanese Customs officials permitted continuation of shipment of 12,349 drums in accordance with their understanding of Japanese law relating to in-transit or temporary landing of cargo. First SCAP knowledge of this type of cargo movement occurred while "Flying Cloud" was enroute Kobe to Yokohama on 10 August 1950 and action was taken immediately to call to the attention of the Japanese Government officials the applicability of Japan's new Export Control Law promulgated 1 December 1949, which carries provisions against removal from bond for export of items comparable to U.S. positive list without special authority of the Ministry of International Trade and Industry and SCAP validation. The Ministry of International Trade and Industry placed in the hands of A.P. Pattison (agents for Isbrandtsen Steamship Company) an official interpretation of the above-mentioned Japanese law ruling that this oil cargo required an export license of the Ministry of International Trade and Industry. Upon receipt of this interpretation 6,460 drums loaded at Kobe were offloaded and returned to Customs bond in Yokohama, 14-15 August. Pattison company protested action on behalf of Isbrandtsen claiming oil to be "in-transit" shipment and not subject to re-export procedures. Customs officials in releasing the 12,349 drums of oil acted under long standing Japanese customs procedure based upon original Act of 1899 which did not recognize goods held in-transit or temporarily landed to have been imported into Japan and consequently not eligible for consideration as Japanese re-exports. Japanese customs accepted U.S. Department of Commerce export licenses as clearing shipment U.S. to North China until action halted by headquarters, Occupation Headquarters

not involved in Japanese customs clearance except on general surveillance basis. No laxity or delinquency can possibly be charged to Occupation authorities. Only discrepancy in Japan was failure by Japanese customs authorities to recognize that all outbound cargo regardless of origin is subject to Japanese export license controls even though it might involve defiance of clearance by U.S. Department of Commerce.

23 October 1950

MEMO FOR RECORD:

1. Incoming radio WCL 20589, 20 October 50, stated that Senate Interstate and Foreign Commerce Committee investigating shipments to China. U.S. Dept. of Commerce advised Committee that 24,000 drums of oil destined for China from the U.S. were offloaded in Japan during March-April. State Dept. testified to Committee that policy to prohibit shipment of strategic materials to China was initiated some months prior to Korean aggression and that SCAP had been so advised; stated that SCAP message C 61416, 28 August 50, cited 12,349 drums of oil shipped from Japan to Tientsin during period 25 June - 11 August 50. State Dept. had indicated that oil shipped from Japan to China during this period apparently due to administrative error or conflict in jurisdiction. Committee chairman stated to press in reference to matter that: "A very lax situation that could have been a tremendous value to the enemy," and "Improper and wrong - a gross miscarriage of regulations". Incoming radio stated that Senate Committee desires information as follows:

- a. Reasons for shipment of 12,349 drums of oil.
- b. Reasons for offloading of 6,460 drums of oil in Yokohama, 14-15 August.

Committee cannot reconcile permitted shipments during period 25 June-11 August with offloading of 6,460 drums, 14-15 August. Secretary of Army requested unclassified reply for release to Committee.

2. Outgoing radio C 61418, 28 August 50, referenced in incoming radio WCL 20589 gave the facts regarding the offloading and shipment of oil in question.

3. The Japanese Customs Law No. 61, 1899 (revised periodically through 1949) and the Japanese Bonded Warehouse Law No. 15, March 1897 (amended periodically through 1946) freely permitted offloading and reshipment of in-transit and temporarily landed cargo. Japanese Customs operated under the provisions of these laws until 14 August 1950 when it was interpreted that the Cabinet Order Concerning Control of Export Trade (Cabinet Order No. 378, promulgated on 1 December 1949) applied to offloaded in-transit shipments as well as shipments of goods of Japanese origin.

4. Japanese Government interpretation of Cabinet Order No. 378 was delivered to A.P. Pattison and Company on 14 August 50 in reference to oil aboard "Flying Cloud". "Flying Cloud" offloaded oil after receipt of Japanese Government interpretation but protested by letter to MITI dated 15 August 50.

5. Subject cable advises:

- a. Reasons for shipment of 12,349 drums of oil.
- b. Reasons for offloading 6,460 drums from the "Flying Cloud".

MEMO FOR RECORD:

1. References are:

a. Memorandum dated 10 October 1950 from John H. Capron ,  
Counsellor at Law, to Mr. R.W. Hale, Chief, Foreign Trade and Commerce  
Division, ESS, GHC, SCAP, subject: Import of Construction Machinery Under  
License C-2814;

b. Memorandum from ESS/FTC dated 10 October 1950 to Far East Air  
Forces, subject: Import of Construction Machinery Under License C-2814; and

c. Letter from Headquarters, Fifth Air Forces dated 17 October  
1950 to CG, GHC, SCAP, ESS/FTC, subject: Equipment Needs - Air Force  
Construction Contracts with Nishimatsu Kensetsu Co., Ltd.

2. Subject radio forwards information to Department of Commerce that  
construction machinery to be imported by Michael J. Banuvar has been licensed  
to enter Japan and is necessary to execute contracts with the Fifth Air Force  
by a Japanese company. This will provide Department of Commerce with  
justification for issuance of export license. Need for early shipment is  
pointed out since Fifth Air Force states the machinery will be needed within  
the next 30 days.

**Z x 21641** For CSGPA, AGAO-C and COT. This msg in 3 parts.  
 Part 1. Joint Regulation AR 55-107 dtd 20 Sep 50 has omitted any consideration for civilian employees or their dependents to provide space available transportation previously authorized in JA-F Bulletin No. 36, 1949. This action obviates authority granted in GFR 11 Section 6-5 to permit employees with 3 years continuous service and also after 1 year to use transportation to the ZI for ordinary leave purposes. The provision of DA Memo 55-120-6, dtd 31 Aug 46 which authorizes space available to US citizens locally hired and their dependents upon completion of assignment is also obviated.

DA Pamphlet No. 29-14, dtd May 1948, as amended, authorizes movement of unaccompanied dependents to and from ZI under certain conditions. No references to cover such extenuating cases are cited. Do existing regulations stated above fall within purview of para 3b, AR 55-107 where conditions and regulations prescribed by the Departments apply in movement of civilians?

Part 2. No consideration given to employees in Guam, Okinawa or Philippines where facilities are limited, to use water transportation to Japan or between the islands mentioned. Allocations of space on the vessels to the individual ports concerned invariably permits space available use in this theater. To improve job performance, as well as to reduce total accrued leave (on which Congressional pressure is now bearing), continual stress has been placed on the desirability of civilians taking annual leave whenever possible.

UNCLASSIFIED

WCL 29601  
D74330  
WCL 22336

6384

FROM: CINCFE TOKYO JAPAN TO: DEPTAR WASHDC GA/CPD ZV/csr 21 Oct 50

UNCLASSIFIED

Elimination of inter-island space defeats the policy of this command. CINCFE has endeavored to afford equal treatment to military and civilian personnel in all matters. Withdrawal of a long standing privilege from one class of people seriously affects the morale of personnel, especially in the isolated areas mentioned. It is difficult enough to obtain personnel for Guam and Okinawa. The elimination of a privilege that does not require the expenditure of funds reduces the effectiveness of sound management in efforts to obtain and retain these people.

Where commercial transportation is available the excessive time lost from the job to make a trip by water where poor connections require long layovers precludes approval of leave by the operating official; Commercial air transportation is out of the question as distance involved to get to any interesting area makes the cost prohibitive.

Part 3. The newly announced policy is considered here to be not to the best interest of the Government, and immediate reconsideration of ordinary leave privileges for civilian employees and their dependents as outlined above is recommended.

MEMO FOR RECORD:

19 Oct 50

1.    Outgoing Radio Z 17652, 25 September 1950, requested that DA forward three copies of all regulations concerning new United States import, export and conservatio controls of strategic materials to ESS, GHQ, SCAP.

2.    At the time Z 176542 was dispatched, it was not known that ESS would be called upon to supply copies to other offices of the headquarters and to the Japanese Government. However, it is now apparent that ESS should undertake to supply copies to other interested persons, therefore, subject radio requested that the mail be increased to ten copies in place of the three previously requested.

For Onthank. In the interest of nonappropriated pers who are being placed on appropriated fund rolls it is rqstd that reconsideration be given to the problem of extending permission to retain grade steps earned by prior service. It is pointed out that psns in this theater are graded in accordance with standards established by the Civil Service Commission as outlined in GHQ, FEC, Cir 48, 1948. The procedure for exchange personnel in the ZI as followed by the A-AFWB where variables are considered in establishing the wage rate is not followed in FEC. Compatability between forces has continually been stressed in grading psns here and in fairness consideration based upon psn allocation, identical living and working conditions and morale are strongly recommended for application in arriving at equitable evaluation. Attention is invited to fact affected pers are all occupying psns authorized by law and budgeted for annually and are only being paid from KAF due to lack of appropriated funds rqstd by this comd. Rqst decision 26 Comptroller General 530 be scrutinized for possible divergence.

WCL 47176. This radio in 7 parts. Part I. Query I. The facilities of the American Consul are now extended to maximum in processing the marriage applications of those aliens whose U. S. spouses are already serving in FEC. It will not repeat not be possible, therefore, to obtain from the American Consular officers in Japan either an investigation or letter indicating, prior to marriage, that the alien spouse of an individual will be entitled to entry into the U. S. upon completion of the marriage, or that a visa will be furnished. Neither is it feasible for this command to attempt to provide reasonable advance assurance that proposed alien spouse can meet immigration requirements. However, the prospective husband should be advised that the proposed alien spouse will have to qualify under the provisions of Title 8 of U. S. Code, except the racial provisions of Sect 13c of the Immigration Act of 1924 which were set aside by PL 717. This command now requires prospective alien spouses to:

- a. Submit evidence of a physical examination by a physician approved by the Consular Service indicating freedom from infectious venereal disease, active tuberculosis and/or other major communicable diseases.
- b. Secure signed statements from responsible parties testifying to the background and character of the prospective alien spouse.
- c. Be able to satisfactorily pass a local police check.
- d. Be able to satisfactorily pass a U. S. counter-intelligence check for derogatory information or subversive activities concerning the prospective alien spouse.

It is suggested that before the DA authorizes the travel of military personnel to the FEC for the purpose of marriage under PL 717 that each individual be required to sign a statement indicating his knowledge of the above requirements and his belief that the prospective spouse will be able to comply with them.

UNCLASSIFIED

FROM: CINCFE, TO: DEPTAR, INFO: COMNAVFE, CG FE/F 3L/PSD JJD/eb 17 Oct 50

Part II. Query II. The following information, to include required documents, can be used to orient those persons in the U.S. who wish to travel to Japan in order to be married under the provisions of PL 717:

- a. Original, or certified true copy of final divorce decree(s) or death certificate of spouse, if applicant has been previously married.
- b. A sworn affidavit of consent of both parents, or legal guardian, for any party who is a minor (under 21 years of age).
- c. U.S. naturalization certificate, or U.S. birth certificate (original or certified copy), or passport.
- d. Written evidence from a recognized physician that the applicant has been found on physical examination to be free from infectious venereal disease, active tuberculosis, and/or other major communicable diseases.
- e. Conference with an Army chaplain or clergyman of his own choice prior to departure from his place of residence. The clergyman should be informed by the applicant of the purpose of his visit to the FEC in order to bring with him such church statements as may be necessary.
- f. Information which will enable applicant to make documented statement after his arrival in FEC as to financial arrangements he has made to insure adequate support of the wife, including financial arrangements in case he becomes a casualty.
- g. Applicants should be advised of possible conflict between state laws and federal law 717 as regards marriage between persons of different races.
- h. In addition civilian applicants will bring with them an original or certified photostatic copy of their honorable discharge showing service in the armed forces subsequent to 7 Dec 41.
- i. Military personnel should have copies of leave orders in their possession.
- j. Military personnel should have evidence of recent origin establishing the willingness of the proposed spouse to enter into the marriage.

Part III. Query III. Individuals should complete such portions of FEC marriage requirements prior to departure from ZI as will permit them to have all the documents listed in Part II above in their possession.

Page 2 of 4

UNCLASSIFIED

UNCLASSIFIED

FROM: CINCFE , TO: DEPTAR, INFO: COLNAVFE, CG FEMF GA/PSD JJD/cb 17 Oct 50

Part IV. In the interest of the individual applicant, and of expediting his return to ZI subsequent to marriage, it is strongly recommended that DA arrange with Dept of Justice to permit the American citizen applicant to file, with Dept of Justice, petition Form I-133 prior to departure from ZI and prior to his marriage.

Failure to make these arrangements will necessitate applicant remaining in Japan for at least six additional weeks following his marriage if husband and wife are to return to ZI concurrently. Another reason for this request is that present Justice Dept procedure requires two witnesses who have known the petitioner at least one year. Anticipate that visitor to Japan would have difficulty meeting this requirement after arrival in Japan.

Part V.

a. Service personnel entering the FEC by air or water should be ordered to report as follows:

- (1) Army personnel will report to Central Billeting, Yokohama Command.
- (2) Navy personnel will report to Receiving Station, Fleet Activities, Yokosuka, Japan.
- (3) Air Force personnel will report to 403d Personnel Processing Squadron, FEAMCOM, Area B.

b. Civilians will report to American Consulate at port of entry.

c. Request CO, Camp Stoneman, Calif, or the CO, POE, be responsible for notifying CINCFE by radio, attention AG-PA, of the departure of service personnel to FEC for the purpose of marriage under PL 717. These personnel should be broken down by Army, Navy, and Air Force, and the radio should include mode of transportation, and ETA.

Part VI.

a. Military personnel on leave in FEC for purpose of marriage under provisions of PL 717 will be provided logistic support in accordance with Army regulations.

b. Civilians desiring to travel to Japan for the purpose of marriage will make application for such travel as tourists through governmental channels as prescribed in para 7, SCAP Cir 11, 16 Jun 50. "Entry

Requirements and Business Activities in Japan," and para 10, SCAP Cir 3, 3 Feb 50, "Control of Entry and Exit of Individuals, Cargo, Aircraft, and Surface Vessels into and from Japan." It will be noted that travel and logistic support is at the expense of and will be arranged by the individual. Processing of the marriage is a problem involving the individuals concerned and the American Consular Office.

Part VII. For your information copies of GHQ, FEC Cir 51, 24 Sep 49, GHQ, FEC Cir 51, 5 Oct 50, SCAP Cir 3, 3 Feb 50, and SCAP Cir 11, 16 Jun 50, are being forwarded your headquarters by airmail.

NOTE FOR RECORD:

1. WCL 46708 stated, in connection with NRS Visiting Expert priority 31, Agricultural Outlook Specialist, that USDA felt it desirable to have two Japanese officials attend Annual Agricultural Outlook Conference of USDA, beginning in Washington 30 Oct, prior to arrival US visiting expert in Japan. SCAP msg Z 19448 stated SCAP concurs but not possible to send Japanese unless DA can finance visit.

2. WCL 49141 recommends that stay of Dr Kogi Saito, GARIOA National Leader Project 135 (Animal Disease Control and Veterinary Medical Associations), sponsored by PH&W Section, who is now in Washington, be extended 30 days to allow him to attend USDA agricultural outlook conference. Msg request early reply since Dr Saito's present tour expires 19 Oct 50.

3. Part 1 of this msg concurs in 30-day extension of Dr Saito's tour in U. S. and states that SCAP assumes additional GARIOA funds will be made available by DA. Part 2 of msg self-explanatory.

MEMO FOR RECORD:

Ind 6 referred to in ref radio informed DA that Tokyo Chamber of Commerce and Industry anticipated completion of its export directory by the end of August and that copies would be forwarded to DA when available. Reference ltr requested 10 copies of All Japan Business Directory referred to in Kyodo news dispatch datelined Tokyo, 8 Sep 50. (Kyodo dispatch stated that All Japan Bus Dir had been completed by Tokyo Chamber and would be distributed to various countries by air shortly.) Tokyo Chamber now states that export directory and All Japan Business Directory refer to publication actually entitled Japan Register of Merchants, Manufacturers and Shippers (published in cooperation with all Chambers of Com & Ind in Japan), one copy of which was furnished today. The Tokyo Chamber further indicated that although coordinated distribution plans have not been completed, 9 additional copies will be furnished this week for forwarding to DA.
