Admission
Notes

20 July 1945. Pt. seen in home at request
of Col. Carter - Has had recurrent
diarrhea 3 mos - severe diarrhea
& blood in past 4 days -

Pt. appears quite weak, obviously
in need of therapy -
admission advised -

Proctoscopy. Mucosa of Rectosigmoid
is stretched & mucous, pus & blood -
No involvement of Rectosigmoid is
seen, but there is obviously a
bacillary dysentery present, from the
gross & microscopic appearance of the
material seen - The greater
portion of this material flowed
down from the sigmoid (above
the height reached by the scope) during
the exam - J. H. Hodder Capt. M.O.D.

27 July Moderate anemia present.
Symptom free now after course
of therapy &
discharged
