of available Special Orders, General Orders, regulations and other official informational media of the U.S. Army and Philippine Army organizations for period prior to the surrender of P.I. to Japanese. Many Orders and other informational media of the Cavite Force and U.S. Army replacement groups (subsequent to landing in the P.I.) are also included in this group.

Microfilms No. 88 and 99
Original and 2 Ozalid copies on file.

Diaries kept by U.S. Army, Navy and Marine Officers and EM, British and Australian Officers and EM, and civilians. Many diaries concern experiences during actual combat, but most concern life as prisoners of war, Japanese atrocities and tortures, both in the Philippine Islands and Japan. Microfilm is not very legible where records were written in pencil or ink. Most extracted (typed) diaries can be read, but with difficulty. The original or extracted diaries are on file, approximately 250 volumes.

Diaries contain some information that could be injurious to Veterans, or to persons still on active duty with U.S. Army. Only a few diaries were checked, and the following examples were found:

(a) 999-2-63 contains allegations of cowardice, desertion; thievery and subsequent demotion of one 1st Sgt. N. F. Thenell, US Army.

(b) 999-2-56 contains accounts of bickerings and controversies between high ranking U.S. Army Officers including an allegation the Colonel Horan had no initiative and that a Capt. Geo. T. Scholey deserted Horan's Command.

(c) 999-2-214 contains general remarks concerning cowardice of the PA soldiers; contains remarks concerning shooting of one PA officer by another (with names) and alleges insanity of a U.S. Army officer by name. Diary also shows information concerning Japanese atrocities committed in POW Camp.

(d) 999-2-180 Diary of Wake Island personnel describes actual eye witness account of a civilian's execution (beheading) by Japanese for stealing food.

From the brief examination made of these files, it is estimated that less than one-third of the microfilms can be properly read. The source records were written on scraps of paper and were yellow with age and indistinct in character at time of microfilming.
