Thursday Apr. 27 - 44

Japanese have announced their desire to pay respect to our War Dead next

Sunday which marks beginning of their Shinto Victory period for such ceremonies in their own.

This has been the practice in the past two years here. The General sends in a check and we are permitted to buy one. Noji and one other officer appears and we hold brief ceremony at the burial ground. The roll call grows longer & longer each year and we start reserved under a building and hear it read. I am

limiting the roll call this year to just those who have died in the past year. Explain to them & many others couldn't stand out there and go there or all this year. We aren't as stout as we used to be.

Long speaks the morning with us. We took him around the Reservation and arranged contacts for him he had wanted. I think we convinced him that we aren't out to rob him or any other camp of any needed supplies and our desire is to get everything to him possible.

He departed with the dogs or about 3pm and we are now at a new low census of 880 but I do not expect it to be for long.

Broke us out for a 3: am tango. Somebody heard a bee ring or thought they did. Much hell raised around the place, Hdqrs arrived and added to the furor of local guards. Nobody missing. Everybody back to bed. Curfew again. All alert continue, marked not go inside at 8 pm. The hot dove buildings are miserable at this hour. A recent Davao prisoner has arrived here showing 19 escapes. Think that has been worked up.

The medical dept occupies a peculiar position in this prison of war game. Escape is OK for everyone else. Leads blame anybody for getting away, if prospects and within reason and the rest are not endangered.

But our job is not to get away. Our job is to stay in spite of hell and take care of our own. The Japs can't

Two years ago today Koregido fell

Nogi appeared about 3 and announced he would inspect the personal effects of the entire working party. This was probably the reason the work party was kept in today for "Yasumi". It was a long boring hot tedious disgusting afternoon, carried out in the usual unorganized manner, un planned, no conception of how to go about a thorough systematic search. Hence - nothing accomplished. The greatest question that arose was where one man got a jug in which he was making vinegar.

Today the Japanese called for a list of all service personnel who had been on duty at Santiago and Ft. Wm. Meridally before the war. After night bugs out when

we were summoned to main bldg where the gestapo interviewed them. They were particularly interested in learning something of a one Lieut Dochbeiser - and thereon possibly being a tale.

The long hot weary days. Shobia dust in our teeth, our hair, our food and our beds. Short service with Nogi on 17th.

Nogi asked "How are the vegetables coming in?" Told him the distasteful pretence received, the reduction of sugar + rice again etc. Only reply was a yawn from between Kubota + Nogi to the accompaniment of great peels of uproarious laughter. None of a big joke — on us I'm thinking.

Wrote commendatory letter to Staff Hospital Corps for maintenance of morale and sustained excellence in performance of duty for past 8 mos. Told him it was time to pep 'em up a bit. Wrote notes in their war records.

Giving much thought to market advances in food prices in past week. Japs for reduced their value to practically nothing and this Jap money they pay us is practically worthless. The Filipinos don't want it and consider it as of no value. Japs are now calling it "Benjo paper". Went into session with Hanson and

later decided that he had merchants require 3000 pers worth of any kind of beans, as well. Peanuts were doubled. Maybe can get few. No better food available to us now than peanuts.

Both were alive. The (300)

American patient, Griffin, Jr., Sgt USA, had been shot thru the exact center of his neck anteriorly, below the thyroid cartilage, and the bullet had passed directly thru him, the wound of exit being just a little to the right of the midline posteriorly at the same level of entry. The guard exhibited a jaggedly torn wound of the ~~cheek~~ chin and face with loss of anterior mandibular substance.

Capt. Paul Ashton (MC) USA, reported that he had been present at the happening and told the following story:

The PC (Ashton) was in end cell on bed reading book (#1);

heard guard & Griffin in conversation outside the open barred cell; heard guard say "me matai, me matai" and

wounded guard to be down at #4. Other Jap guards came up. Stitches were brought and cases removed. Ashton had rifle in his hands when guards came up.

Identified Kubata's duty non com. Kumura came over from headquarters. Recommended that guard be removed to Jap hospital at once and reported to Kubata that American would probably die. Jap removed by car. Lamborn began investigation by taking statements of Jap guards and Ashton's statements which varied somewhat in the retelling. Then repaired to 16 where patients were interviewed who saw anything. One Corporal Stamper actually saw guard shoot Giffin. One saw guard shoot himself. One Corporal ^{Hartwell} saw guard shoot himself. Testimony however convinced me there was something wrong about Ashton's story of the guard's running around after

shooting himself and the taking

of course, the whole thing was stupid, the old log stuff - again. Was on it and see what comes out. This Jap guard has had 900000 for 3 or 4 months. He has been trying to get Suifa drops from Americans. Just a short time before the shooting, this guard called an American from outside 16 to come in - paid him money - Sgt of guard caught him - guard threw money on ground & tried to shift blame to American. Nothing was done about it by Sgt. of guard. At investigation, Jap Sgt. did not mention this during investigation. The American involved was Howell, rd 3, leaving on draft tomorrow for Babauatan. The guard involved has a reputation of having been very friendly always to Americans.

"me matai" is pigeon tagalog which can be interpreted as "I die."

Looks as tho guard repeats to Guffman that he, the guard, was about to die - Guffman not understanding says - "OK - you die." That's the way the testimony stands.

Not being satisfied with Ashton's statement I went up to 13 tonight to see further for eye witnesses from 13 the whole area is in view. I knew that as soon as the shot was heard, everybody in ear shot would be looking

Before I could carry this over, Dwyer came to me and reported that from 13, he + Parker had seen what took place 15 sec. after second shot was fired.

The essential and interesting features were:

1. The wounded guard was countrian but lying flat upon the ground between 2 gaps.
2. Ashton nor any other American appeared in view.
3. The rifle was lying on the grass in plain view and near enough to the guard to have been dropped there by him.

Yesterday, a small contribution of food
arrived from "Neutral Sympathizers".
However, it is evident that the
contribution as turned over to
the Japanese was made for
some one camp, and the Japa-

and economy of distribution,
had divided the same stuff so that
several camps would get an in-

Having my momentary differences with my loyal ally Mr. Leames. He has had so damn much trouble with the work party that he has developed an antipathy toward them and our issue evolving in normal discourse with them is just like waving a red flag in front of bull as far as Jerry is concerned. Such a momentary attitude degenerates into "personalities" and gets a guy down in the mood. All day yesterday I had to keep a tight curb on the "Rebel" just to keep him on even keel until he can get his bearings again. He went to bed this shouldering and was at peace with the world. Maybe better today or tomorrow.

The usual minor bickerings and issues of prison life continue to occupy my time - Joe Blow didn't get his tobacco and somebody else got 2 - so Joe believes - but turns out that they didn't etc. - Somebody sees some one get a pencil or 2 sheets of paper - immediately that somebody can think of a hundred reasons why he should have a pencil and at least one sheet of paper. All of these issues are momentous things to these people - alas!

Ducky very peeved. Writes a memo to Nogai asking that he be allowed to withdraw his 50.00 contribution to the Indycan Fund. I presented the request to Japanese, and they agreed to let him do so. I explained the situation to the Japs, my policy of "dividing the wealth," and the Japs agree with me in policy and consider it proper in attitude and if I want to set such a policy they don't care, in fact approve it, but they cannot disagree with a measure themselves regarding pay. I emphatically stated that I would never consent to denying buying power to the indigent prisoners in order to increase the fund for "hawk". I stated that someday the American people would call to account such officers who took such an attitude of personal selfish interest at the expense of the men and I certainly would never condone such conduct. So far the Japs have balked me in principle but I have gotten any further on the obtaining of the cash which brings up this matter.

Felt very good to have Balthus come over and tell me he wanted me to know that the majority were with me over there in SOI. Only encouraging back up I've heard in months. My quodreep + aut. tibial weakness has returned and I am again 3/9 stopping my job. No serious changes

Divine Services as usual.

There has been no time for even making entry in this war book since the above date. Fighting for food intensified on May 29th. Reductions in allowances, failure to even meet the reduced allowances (as usual), threats of further reductions, all combined to again land us into another series of heavy protestations, conferences, talks etc. We outlined for Kubota known causes for our shortening rations and how they could be remedied. Two outstanding shortages are:

Grain is issued in sacks said to be 60K.

They average 100% shortage. The Japs insist on recording we are being fed 60K from each sack, but admit to us they are 100% short. They admit they can do nothing because "if the Jap. army

delivers us 60K sacs. They must be 60K sacs.

They did concede us the point of allowing us to draw grain for drafts arriving after issue day. We had rebelled against asking us rations on 7 + 5 basis because "they cost more now than they use to so 7 = 100% now."

Preliminary conversations with Kubota failed.

I announced to him that I wanted to talk with Nazi and expected to lay before him a formal written request to be allowed to contact neutral agencies in Manila in view of releasing the starving condition of American prisoners; also for information to the Neutral Home Front -

pitfalls, over a sponge of sugar. However, our discipline remains very good to date. We have rules along lines that does not require us to talk in slack. The slack has been kept tight. The very is at a minimum and personal relations among them as a whole are on a normal even keel.

Noqi came in for conference and Wode & I laid before Kubota & Noqi (verbally) our request to have the use of our deposit money, and the right to contact neutral agencies in Manila. Noqi directed that both the requests be submitted in writing since they were questions he could not settle and would have to lay before Hd. Qrs. Within 2 days I submitted the written proposals and asked that the money from the deposits be applied to the Gen. Fund. Noqi wanted to know how many depositors would be willing to give what portion of their deposits to the fund. Accordingly I issued a memo to all depositors asking them to answer that question and indicated what the expectation was for. Out of 142 depositors all but 18 indicated their desire to contribute to the fund. The 18 (Colonels and selfish army satellites) held a SOI meeting and refused to contribute any without "certain provision" and of course the very first provision was that the Indigenes prisoners not have any spending power in the store and that they (the Indigenes) have the right to spend all their 70 pes.

Our policy is, and always will be that we will never sacrifice the welfare of the low man for the brass; we believe it is the duty of the brass to care for the men.

June 15, 1944.

The draft of 254 left for Cabanatuan this morning. Parade at 0335 and movements began soon after.

Smooth get away. The medical officers from Cabanatuan arrived yesterday afternoon to accompany the patients' draft. Capt. Immerman & Cays are in charge of med. detail.

I last saw Immerman on Dec 24 1940 as I passed thru the lines of the 57th as they fell back from Olongapo.

An unfortunate episode - reported to me this morning that Ritter was off his top last night and sent the messenger to 18 to tell Col. Duckworth to go to hell. Ritter explains it by

saying in a joking way in the clinic to one of the boys - "Now is a good time for you to tell Duckworth to go to hell."

However, I am not satisfied with the situation. The messenger has gone to Cabanatuan and I must get all details.

However, it is evident that further investigation is warranted and details known must be filed. In the evidence is very much against Ritter - except -

Ritter is "off his beam" - breaking up - the extenuating fact of mental imbalance may be present.

Chaplain Duffie came in and reported the matter to me also. Reason on his part known. Duckworth told him his story is identical with direct evidence at hand.
