MORNING REPORT

(See AR 345-400)

INSTRUCTIONS FOR PREPARING MORNING REPORT

READ THESE INSTRUCTIONS CAREFULLY

The forms contained within this book have been designed for either typewritten or handwritten methods of entry.

1. For typewriter use

a. Extract one complete set of triplicate forms from the book.

b. Insert carbons between each sheet of triplicate form. (Extra carbons for typewriter use are provided in the back of the book.)

c. Roll form into typewriter, top end first, to the date line.

(1) Once the form is aligned in the machine to the date line, no further adjustment is necessary. All horizontal and vertical lines are registered for standard typewriter spacing.

d. The use of the tabulator bar or key, properly set in line with column headings, will speed up the typing of the serial number, name, and grade entries to be made.

2. For handwritten use

a. Do not detach sets from the book.

b. Carbons attached to the stub at the front of the book are for handwritten use. When these carbons are used for the first time, detach tissue protecting sheets.

c. Insert carbons between sheets of triplicate form. Do not detach carbons from stub.

d. Care should be exercised when extracting completed report that carbons be left intact and attached to the stub for future use, except as may be provided otherwise for safeguarding military information.

e. When form is filled out, detach it from book by gripping pasted stub.

(1) Carbons should remain attached to the stub at all times and can be inserted into each new set.

f. Fresh pencil carbons are provided in the middle of the book. When these carbons are reached, the used carbons should be torn out and destroyed.

For complete instructions on procedures see AR 345-400.
